- Highly evolved features to make every performance unique
- Supports multiple media and formats
- High-quality audio circuitry for a faithful reproduction of sound

Included DJ Music Management Software

Made for

iPod iPhone iPad

PRODUCT FEATURES CDJ-900NXS

1 Full color LCD screen with improved browsing and track information

The CDJ-900NXS has a large screen which displays a host of track information and features inherited from the CDJ-2000NXS.

① "Improved browsing"

DJs can choose how they view tracks – list, artwork, or custom view – and scroll through using the large rotary dial.

② "Wave" / "Wave Zoom"

In addition to Wave Display, Wave Zoom¹¹ enables even more precision on loops and cues.

③ "Beat Countdown" and "Phase Meter"

•Beat Countdown
DJs can use "rekordbox™" to mark key points on a track, and the CDJ-900NXS counts down to them from up to 64 bars away.

•Phase Meter
Shows the position of the beat in the bar, enabling DJs to compare the phase of each player with the master deck at a glance. This information can be displayed simultaneously on other Multi Player connected via "PRO DJ LINK"¹².

2 Compatible with music management software "rekordbox™"

Music files can be analyzed with "rekordbox™" installed on a computer, music can be managed (settings, create/edit, save logs) in a manner that is suitable for DJ performances, and the music to be used can be prepared in advance. By using the iOS version of "rekordbox™" (download from the App Store free of charge), preparation of music can be done anywhere with your iPhone/iPod touch/iPad devices. Android version of "rekordbox™" (download from Google Play free of charge) for Android OS devices as well.

- 1.Data analysis of music files "WAVE ZOOM", "KEY", "WAVE", "BEAT GRID", "BPM", "ID3 TAG", etc.
- 2."ACTIVE LOOP", "HOTCUE AUTO LOAD", "CUE" and "LOOP" settings for each track. 3.Create/edit "PLAYLISTS".
- 4.Save playback log information for music files played on this device.

3 DJ play using music stored inside smartphones and tablets via Wi-Fi/USB connection^{3*4}

Music stored inside Wi-Fi/USB-connected iPhone/iPod touch/iPad devices can be transmitted to the "CDJ-900NXS" for DJ performances. The touch panel displays of these devices can be used for intuitive operations. In addition, the enclosed Mac version of "rekordbox™" can be used to send music to the "CDJ-900NXS" from inside a Wi-Fi-connected Mac. Also, when connected via USB, the iPhone/iPod touch/iPad devices can be charged during a performance. Android OS devices and Windows PCs also can send music via Wi-Fi/USB connections.

4 Highly evolved features to make every performance unique

BEAT DIVIDE

Beat Divide buttons enable DJs to slice up the beat and roll it around in a loop. Beat Divide can be incorporated with Slip Mode to enter Slip Loop – so the track instantly comes back in at the right place when DJs release the Beat Divide button.

BEAT SYNC¹

Looks at the "rekordbox™" beat grids of music, on up to four connected players, and snaps them to the beat of the master deck.

QUANTIZE¹

A dedicated ON/OFF button puts Quantized loops and cues at DJs' fingertips. This enables reliable performance without breaking the rhythm of music during playback.

SLIP

Silently continues track playback during a loop, reverse or scratch and brings the music back at the right point when the DJ exits the performance.

BEAT DIVIDE

5 Supports multiple media and formats

In addition to smartphones, tablets, laptops and PCs, music files can be played from USB storage devices, audio CDs and CD-R/RW. The CDJ-900NXS supports MP3, AAC, WAV and AIFF file formats.

6 High-quality audio circuitry for a faithful reproduction of sound

The CDJ-900NXS boasts professional quality audio circuitry and an onboard sound card, for a clear, powerful sound even at club volumes. A precision engineered Wolfson DAC reduces jitter, while the player's signal-to-noise ratio of 115dB ensures incredibly accurate sound reproduction.
