IMPORTANT SAFEGUARDS

Please read all of these instructions regarding your display and retain them for future reference.
1. Read this manual fully and carefully before operating your display.
2. Keep this manual handy as a reference for operating procedures and safety information.
3. Pay close attention to all warnings in this manual and follow the instructions carefully.
4. Do not allow other persons to use this system until they have read and understood the operating instructions.
5. Do not install the display where it may (i) obstruct the driver’s vision, (ii) impair the performance of any of the vehicle’s operating systems or safety features, including air bags, hazard lamp buttons or (iii) impair the driver’s ability to safely operate the vehicle.
6. Do not operate this display if doing so in any way will divert your attention from the safe operation of your vehicle. Always observe safe driving rules and follow all existing traffic regulations. If you experience difficulty in operating the system or reading the display, park your vehicle in a safe location and make necessary adjustments.
7. Please remember to wear your seat belt at all times while operating your vehicle. If you are ever in an accident, your injuries can be considerably more severe if your seat belt is not properly buckled.
8. Never use headphones while driving.
9. To promote safety, certain functions are disabled unless the parking brake is on, and the vehicle is not in motion.
10. Never set the volume of your display so high that you cannot hear outside traffic and emergency vehicles.

WARNING
- Do not attempt to install or service your display by yourself. Installation or servicing of the display by persons without training and experience in electronic equipment and automotive accessories may be dangerous and could expose you to the risk of electric shock or other hazards.

To ensure safe driving

WARNING
- LIGHT GREEN LEAD AT POWER CONNECTOR IS DESIGNED TO DETECT PARKED STATUS AND MUST BE CONNECTED TO THE POWER SUPPLY SIDE OF THE PARKING BRAKE SWITCH. IMPROPER CONNECTION OR USE OF THIS LEAD MAY VIOLATE APPLICABLE LAW AND MAY RESULT IN SERIOUS INJURY OR DAMAGE.
- To avoid the risk of damage and injury and the potential violation of applicable laws, this unit is not for use with a video screen that is visible to the driver.
- To avoid the risk of accident and the potential violation of applicable laws, no viewing of front seat video should ever occur while the vehicle is being driven. Also, rear displays should not be in a location where they are visibly distracting to the driver.
- In some countries or states the viewing of images on a display inside a vehicle even by persons other than the driver may be illegal. Where such regulations apply, they must be obeyed and this unit’s DVD features should not be used.

When you attempt to watch a video image while driving, the warning Viewing of front seat video source while driving is strictly prohibited. will appear on the front display.
To watch a video image on the front display, park your vehicle in a safe place and apply the parking brake.

**When using a display connected to V OUT**
Passengers in the rear seat can also watch DVDs or the TV if you connect this unit to a display using the V OUT.

**WARNING**
NEVER install the rear display in a location where the driver can watch a DVD or TV while driving.

**When using the rear view camera**
With an optional rear view camera, this unit can be used as an aid to keep an eye on trailers, or when backing into a tight parking spot.

**WARNING**
• SCREEN IMAGE MAY APPEAR REVERSED.
• USE INPUT ONLY FOR REVERSE OR MIRROR IMAGE REAR VIEW CAMERA. OTHER USE MAY RESULT IN INJURY OR DAMAGE.

**CAUTION**
• The rear view camera function is to be used as an aid to keep an eye on trailers, or while backing up. Do not use for entertainment purposes.
• Please note that the edges of the rear view camera images may differ slightly according to whether full screen images are displayed when backing up, and whether the images are used for checking the rear when the vehicle is moving forward.

**To avoid battery exhaustion**
Keep the vehicle engine running when using this unit to avoid draining the battery power.
- When no power is supplied to this unit, such as when the vehicle battery is being replaced, the microcomputer of this unit returns to its initial condition. We recommend that you transcribe the audio adjustment data.

**WARNING**
Do not use with vehicles that do not feature an ACC position.
About this unit

CAUTION
This product is a class 1 laser product classified under the Safety of laser products, IEC 60825-1:2007, and contains a class 1M laser module. To ensure continued safety, do not remove any covers or attempt to gain access to the inside of the product. Refer all servicing to qualified personnel.

CLASS 1 LASER PRODUCT

CAUTION—CLASS 1M VISIBLE AND INVISIBLE LASER RADIATION WHEN OPEN, DO NOT VIEW DIRECTLY WITH OPTICAL INSTRUMENTS.

CAUTION:
USE OF CONTROL OR ADJUSTMENT OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.
CAUTION:
THE USE OF OPTICAL INSTRUMENTS WITH THIS PRODUCT WILL INCREASE EYE HAZARD.

CAUTION
• Do not allow this unit to come into contact with liquids. Electrical shock could result. Also, damage to this unit, smoke, and overheating could result from contact with liquids.
• Keep this manual handy for future reference.
• Always keep the volume low enough to hear outside sounds.
• Avoid exposure to moisture.
• If the battery is disconnected or discharged, any preset memory will be erased.

DVD video disc region numbers
Only DVD video discs with compatible region numbers can be played on this player. You can find the region number of the player on the bottom of this unit and in this manual (refer to Specifications on page 108).

Operating environment
This unit should be used within the temperature ranges shown below.
Operating temperature range: −10 °C to +60 °C
EN300328 ETC test temperature: −20 °C and +55 °C

In case of trouble
Should this product fail to operate properly, please contact your dealer or nearest authorized Pioneer Service Station.

Resetting the microprocessor
By pressing RESET, you can reset the microprocessor to its initial settings without changing the bookmark information.
The microprocessor must be reset in the following situations:
• Before using this unit for the first time after installation
• If the unit fails to operate properly
• When strange or incorrect messages appear on the display

1 Turn the ignition switch OFF.
2 Press RESET with a pen tip or other pointed instrument.

![RESET button (AVH-P4350DVD)]

![RESET button (AVH-P3350BT)]

**Note**
Switch your engine ON or set the ignition switch to ACC ON before pressing **RESET** in the following situations:
- After completing connections
- When erasing all stored settings
- When resetting the unit to its initial (factory) settings

**Demo mode**
The feature demo automatically starts when you select **Source Off** for the source and continues while the ignition switch is set to ACC or ON. To cancel the feature demo, press and hold **MUTE**. Press and hold **MUTE** again to restart. Operating the feature demo while the car engine is turned off it may drain the battery power.

**Important**
Failure to connect the red lead (ACC) of this unit to a terminal coupled with ignition switch on/off operations may lead to battery drain.

**Adjusting the response positions of the touch panels (Touch Panel Calibration)**
If you feel that the touch panel keys on the screen deviate from the actual positions that respond to your touch, adjust the response positions of the touch panel. Refer to *Adjusting the response positions of the touch panels (Touch Panel Calibration)* on page 73.

**Use and care of the remote control**

**Installing the battery**
Slide the tray on the back of the remote control out and insert the battery with the plus (+) and minus (–) poles aligned properly.
- When using for the first time, pull out the film protruding from the tray.

**WARNING**
- Keep the battery out of the reach of children. Should the battery be swallowed, consult a doctor immediately.
- Batteries (battery pack or batteries installed) must not be exposed to excessive heat such as sunshine, fire or the like.

**CAUTION**
- Use one **CR2025 (3 V)** lithium battery.
- Remove the battery if the remote control is not used for a month or longer.
- There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type.
- Do not handle the battery with metallic tools.
• Do not store the battery with metallic objects.
• If the battery leaks, wipe the remote control completely clean and install a new battery.
• When disposing of used batteries, comply with governmental regulations or environmental public institutions’ rules that apply in your country/area.

**Using the remote control**
Point the remote control in the direction of the front panel to operate.

**Important**
• Do not store the remote control in high temperatures or direct sunlight.
• The remote control may not function properly in direct sunlight.
• Do not let the remote control fall onto the floor, where it may become jammed under the brake or accelerator pedal.

Basic operations

1. **Source Off**
   - Displaying the source menu.

2. **Switching to clock adjustment display.**
   - Refer to Setting the clock on page 15.

3. **Radio**
   - Selecting a favorite source.
   - When the source icon is not displayed, it can be displayed by touching the screen.

4. **Switching the output source for the rear monitor.**
   - Refer to Setting rear monitor output on page 72.

5. **Switching the rear view image on or off.**

6. **Turning the unit off.**

**Selecting a source using the buttons**

1. Press **SRC/OFF** to cycle through the sources listed below:
   - **Radio** – Radio
   - **TV** – Television
   - **AV** – AV input
   - **Disc** – Built-in DVD player
   - **USB/iPod** – USB/iPod
   - **SD** – SD memory card
   - **EXT1** – External unit 1
   - **EXT2** – External unit 2
   - **AUX** – AUX
   - **TEL/Audio** – Bluetooth telephone/audio player (Function of AVH-P4350DVD)

   - When the source icon is not displayed, it can be displayed by touching the screen.
   - While operating the menu, you cannot select a source by touching the source icon.

**Adjusting the volume**

1. Press +/- (VOLUME/VOL) to adjust the volume.

**Notes**

- In this manual, iPod and iPhone will be referred to as “iPod”.
- The **USB/iPod** icon will change as follows:
  - **USB** is displayed when a USB storage device is connected.
  - **iPod** is displayed when an iPod is connected.
  - **USB/iPod** is displayed when no device is connected.

- When appropriately set up, the image from the rear view camera can be displayed automatically. For details, refer to Setting the rear view camera (back up camera) on page 66.
- An external unit refers to a Pioneer product, such as those which will be available in the future. Although incompatible as a source, the basic functions of up to two external units can be controlled with this unit. When two external units are connected, the external units are automatically allocated to external unit 1 or external unit 2.
Basic operations

Operating the scroll bar and the scrubber bar

1. Scroll icon
   Appears when selectable items are hidden.

2. Scrubber bar
   Appears when the playback point can be specified or set by dragging.

Viewing the hidden items
1. Touch the scroll icon or drag the scrubber bar to view any hidden items.

Specifying the playback point
1. Drag the scrubber bar on the screen.
   (Not available when the scrubber bar is grayed out.)

Activating the touch panel keys

1. Touch panel keys
   Perform various operations by touching the panel.

2. Open/close keys
   Control the touch panel key area by touching these keys.

Turning the display to simplified display.
Returning to the normal display by touching the screen when playing moving images.
Returning to the normal display by touching same icon when playing audio.

Viewing the hidden touch panel keys.
Shorten the touch panel area.
Common operations for menu settings/lists

(AVH-P3350BT only)
Starting the Bluetooth telephone menu.
Refer to Introduction of Bluetooth telephone operations on page 24.

Displaying the list menu.
Starting the search function.

Displaying the menu.
Refer to Introduction of menu operations on page 46.

Displaying still images as a slide show when listening to another source.
Viewing slide shows.
Refer to Introduction of still image playback operations on page 22.

Returning to the previous display.
Returning to the previous list/category (the folder/category one level higher.)

- Press and hold MENU to display Picture Adjustment.
  Refer to Changing the picture adjustment on page 72.

Adjusting the LCD panel angle
(Function of AVH-P4350DVD)

CAUTION
Keep hands and fingers clear of the unit when opening, closing, or adjusting the LCD panel. Be especially cautious of children’s hands and fingers.

1 Press △(eject) to display the ejecting menu.

2 Adjust the LCD panel to an easily viewable angle.

Press and hold MENU to display Picture Adjustment.
Refer to Changing the picture adjustment on page 72.

- Laying the panel down.
- Returning the panel to the upright position.

- As the set angle is saved, the LCD panel will automatically be adjusted to the same position the next time the LCD panel is opened.

Ejecting a disc
(AVH-P4350DVD)

1 Press △(eject) to display the ejecting menu.

2 Eject a disc.

Ejecting a disc
(AVH-P3350BT)

- Press △(eject).

Ejecting an SD
(AVH-P4350DVD)

1 Press △(eject) to display the ejecting menu.

2 Eject an SD.

3 Press an SD to eject.
Ejecting an SD
(AVH-P3350BT)

- Press an SD to eject.

Setting the clock

1. Switch to Clock Adjustment display.
   Refer to Basic operations on page 12.

2. Select the item to set.

3. Touch ▲ or ▼ to set the correct date and time.
Introduction of tuner operations

1. Touch panel keys

   1. **Local**
      - Turning local seek tuning on and off.
      - Refer to Tuning in to strong signals on page 30.

   2. **EQ**
      - Displaying the EQ (Audio function menu).
      - Refer to Using the equalizer on page 47.
      - Touch and hold for more than two seconds to turn the auto-equalizer on or off.
      - Refer to Using the auto-equalizer on page 48.

   3. **Preset channel**
      - Displaying the preset channel list.
      - Refer to Storing and recalling stations on page 30.
      - Refer to Storing the strongest stations on page 30.

   4. **Band**
      - Selecting a band (FM1, FM2, FM3 for FM or AM).

   5. **Manual tuning**
      - Recalling radio station frequencies assigned to preset tuning keys.

   **Manual tuning (step by step) using the buttons**
   - Press ◀ or ▶ (TRACK/SEEK).

   **Seek tuning using the buttons**
   - Press and hold ◀ or ▶ (TRACK/SEEK).

Note
Listening AM radio while an iPod is charged from this unit may generate noise. In this case, disconnect the iPod from this unit.
Introduction of video playback operations

You can view DVD/DVD-R/DVD-RW/CD/CD-R/CD-RW/USB/SD/iPod.

- (AVH-P4350DVD)
  If an iPod with video capabilities is connected to this unit using an interface cable such as the CD-IU50V (sold separately), you can enjoy the video contents of the iPod as an iPod source.

- (AVH-P3350BT)
  If an iPod with video capabilities is connected to this unit using an interface cable such as the CD-IU200V (sold separately), you can enjoy the video contents of the iPod as an iPod source.

Touch panel keys

1. Selecting the repeat range. Refer to Repeating playback on page 32.

2. During playback, touch the point at which you want to resume playback the next time the disc is loaded. Refer to Resume playback (Bookmark) on page 33.

3. Changing the screen mode. Refer to Changing the wide screen mode on page 37.

4. Switching the equalizer curves. Refer to Using the equalizer on page 47. Touch and hold for more than two seconds to turn the auto-equalizer on or off. Refer to Using the auto-equalizer on page 48.

5. Switching between audio languages during playback. Refer to Changing audio language during playback (Multi-audio) on page 34.

6. Switching between subtitle languages during playback. Refer to Changing the subtitle language during playback (Multi-subtitle) on page 34.

7. Switching among viewing angles during playback. Refer to Changing the viewing angle during playback (Multi-angle) on page 35.
Switching the audio output, when playing video discs recorded with LPCM audio. Refer to Selecting audio output on page 35.

Switching between stereo and monaural audio output, when playing Video CD discs.

Starting the search function. Refer to Searching for the part you want to play on page 34. Refer to Selecting files from the file name list on page 36.

Displaying iPod menus. Refer to Playing videos from your iPod on page 32 and Browsing for a video/music on the iPod on page 33.

Pausing playback. Returning to normal playback during paused, slow motion, or frame-by-frame playback.

Displaying the DVD menu during DVD playback. Refer to Operating the DVD menu on page 30.

Returning to the top menu during DVD playback.

Stopping playback. Stopping playback at the point set in Resume playback. Touch one more time to stop playback completely when playing DivX. Refer to Resume playback (Bookmark) on page 33.

Displaying arrow keys to operate the DVD menu. Refer to Using the arrow keys on page 31.

Skipping to another title. Selecting a folder during DivX file playback.

Moving ahead one frame at a time during playback. Refer to Frame-by-frame playback on page 34. Touch and hold for more than two seconds to slow down playback speed. Speeding up the playback speed in four steps during slow motion playback on DVD video/Video CD.

Speeding down the playback speed in four steps, during slow motion playback on Video CD.

Returning to the specified scene to which the DVD currently being played has been preprogrammed to return. Refer to Return to the specified scene on page 35.

Playing the video on your iPod in a random order. Refer to Random play (shuffle) on page 32.

Switching the Advanced sound retriever function setting when playing a video on your iPod. Refer to Using advanced sound retriever on page 36.

Conducting operation from your iPod and listening to it using your car’s speakers. Refer to Operating this unit’s iPod function from your iPod on page 31.

Switching between media file types to play on DVD/CD/USB/SD. Refer to Switching the media file type on page 30.
Playing back videos

1 Insert the disc into the disc loading slot with the label side up. Playback will automatically start.
- If you are playing a DVD or Video CD, a menu may appear. Refer to Operating the DVD menu on page 30 and PBC playback on page 35.
- When the automatic playback function is on, the unit will skip the DVD menu and automatically start playback from the first chapter of the first title. Refer to Automatic playback of DVDs on page 63.
- While an iPod is connected to this unit, PIONEER, Accessory Attached or (check mark) is displayed on the iPod.
- When the source icon is not displayed, it can be displayed by touching the screen.
- Disconnect headphones from the iPod before connecting it to this unit.
- Depending on the iPod model and the amount of data stored in the iPod, it may take some time for playback to begin.
- Use the touch panel keys to select the iPod after connecting it to this unit.
- No Device is displayed when disconnecting the iPod.
- If a message is displayed after loading a disc containing DivX VOD content, touch Play. Refer to Playing DivX® VOD content on page 37.

Ejecting a disc

1 Refer to Ejecting a disc on page 14 or Ejecting an SD on page 14.

Selecting a chapter using the buttons

1 Press ▲ or ▼ (TRACK/SEEK).

Fast forwarding or reversing using the buttons

1 Press and hold ▲ or ▼ (TRACK/SEEK).
- Fast forward/fast rewind may not always be possible on some discs. In such cases, normal playback will automatically resume.

Notes

- This DVD player can play back a DivX file recorded on CD-R/RW or DVD-R/RW. (Please see the following section for files that can be played back. Refer to page 102.)
- Do not insert anything other than a DVD (-R/-RW) or CD (-R/-RW) into the disc loading slot.
- If the bookmark function is on, DVD playback resumes from the selected point. For more details, refer to Resume playback (Bookmark) on page 33.
- Some operations may not be available while watching a DVD due to the programming of the disc. In such cases, the icon appears on the screen.
- To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.
- While the iPod is connected to this unit, the iPod cannot be turned on or off. However, the iPod can be turned on or off when you select an SD as the source.

En 19
Introduction of sound playback operations

You can listen to DVD-R/DVD-RW/CD/CD-R/CD-RW/USB/SD/iPod sound files.

**CD**

1. Selecting the repeat range. Refer to Repeating playback on page 32.
2. Playing songs in random order. Refer to Random play (shuffle) on page 32.
3. Switching the Advanced sound retriever function setting when playing audio. Refer to Using advanced sound retriever on page 36.

**iPod audio**

1. Pausing and starting playback.
2. Selecting a folder.
3. Switching between media file types on a DVD/CD/USB/SD. Refer to Switching the media file type on page 30.
4. Playing songs on the iPod in random order. Refer to Random play (shuffle) on page 32.
5. Changing the speed of audiobook playback on the iPod. Refer to Changing audiobook speed on page 36.

You can control an iPod with this unit by using a cable such as the CD-IU50 (sold separately).

- **Touch panel keys**
  1. Touch and hold for more than two seconds to turn the auto-equalizer on or off. Refer to Using the auto-equalizer on page 48.
  2. Displaying a list of track titles/file names to select songs on a CD. Refer to Selecting tracks from the track title list on page 36.
  3. Displaying the file name list to select the files. Refer to Selecting files from the file name list on page 36.
  4. Displaying iPod menus. Refer to Browsing for a video/music on the iPod on page 33.
  5. Playing songs on the iPod in random order. Refer to Random play (shuffle) on page 32.
  6. Changing the speed of audiobook playback on the iPod. Refer to Changing audiobook speed on page 36.
### Playing audio

<table>
<thead>
<tr>
<th>Switching to Link Search mode to play songs related to the currently playing song on the iPod. Refer to Displaying lists related to the currently playing song (Link Search) on page 36.</th>
</tr>
</thead>
<tbody>

</table>

#### Artwork display

Starting Album Link Search on your iPod when you touch the artwork display. Refer to Displaying lists related to the currently playing song (Link Search) on page 36.

#### Playing back sound
1. Insert the disc into the disc loading slot with the label side up. Playback will automatically start.
2. While an iPod is connected to this unit, PIONEER Accessory Attached or ✓ (check mark) is displayed on the iPod.
3. When the source icon is not displayed, it can be displayed by touching the screen.
4. Depending on the iPod model and the amount of data stored in the iPod, it may take some time for playback to begin.
5. Use the touch panel keys to select the iPod after connecting it to this unit.
6. No Device is displayed when disconnecting the iPod.

#### Ejecting a disc
1. Refer to Ejecting a disc on page 14 or Ejecting an SD on page 14.

#### Selecting a track using the buttons
1. Press ‹ or › (TRACK/SEEK).

#### Fast forwarding or reversing using the buttons
1. Press and hold ‹ or › (TRACK/SEEK).

#### Notes

- When playing back files recorded as VBR (variable bit rate) files, the play time will not be correctly displayed if fast forward or reverse operations are used.
- To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.
- While the iPod is connected to this unit, the iPod cannot be turned on or off. However, the iPod can be turned on or off when you select an SD as the source.
- If the characters recorded on the disc are not compatible with this unit, those characters will not be displayed.
- Text information may not be correctly displayed depending on the recorded environment.
- Disconnect the USB portable audio player/USB memory when you are done using it.
- When you select Clock or Speana on Selecting the background display on page 71, the artwork is not displayed.
**Playing still images**

**Introduction of still image playback operations**

You can view still images saved in CD-R/CD-RW/USB/SD.

**CD**

When loading a CD-R/RW/USB/SD containing JPEG picture files, this unit starts a slideshow from the first folder/picture on the disc/device. The player displays the pictures in each folder in alphabetical order.

The table below shows the controls for viewing a slideshow.

- **Touch panel keys**
  - Touch any of the following touch panel keys to select the function to be adjusted.

1. Selecting the repeat range. Refer to Repeating playback on page 32.
2. Playing files in a random order. Refer to Random play (shuffle) on page 32.
3. Changing the screen mode. Refer to Changing the wide screen mode on page 37.
4. Displaying the file name list to select the files. Refer to Selecting files from the file name list on page 36.
5. Starting or pausing the slideshow.
6. Rotating the displayed picture 90° clockwise.
7. Capturing an image in JPEG files. Refer to Capture an image in JPEG files on page 37.
8. Selecting a folder.
9. Switching between media file types. Refer to Switching the media file type on page 30.

- **When playing a disc containing a mixture of various media file types**

Playing still images

1. Insert the disc into the disc loading slot with the label side up. Playback will automatically start.
   - When the source icon is not displayed, it can be displayed by touching the screen.

Ejecting a disc

1. Refer to Ejecting a disc on page 14 or Ejecting an SD on page 14.

Selecting a file using the buttons

1. Press ‹ or › (TRACK/SEEK).
   - You can search 10 JPEG files at a time.

Fast file searching

1. Press and hold ‹ or › (TRACK/SEEK).

Notes

- This unit can play back a JPEG file recorded on CD-R/CD-RW/SD/USB storage device. (Please see the following section for files that can be played back. Refer to page 102.)
- Files are played back in file number order and folders are skipped if they contain no files. (If folder 01 (ROOT) contains no files, playback commences with folder 02.)

---

<i>En</i>
Playing still images

Introduction of still image playback as a slideshow operations
You can view still images saved in CD-R/CD-RW/USB/SD as a slideshow when listening to another source.

The table below shows the controls for viewing a slideshow.

1 Touch panel keys
   Touch any of the following touch panel keys to select the function to be adjusted.

1  Playing files in a random order.
   Refer to Random play (shuffle) on page 32.

2  Changing the screen mode.
   Refer to Changing the wide screen mode on page 37.

3  Selecting a folder.

4  Selecting a file.

5  Starting or pausing the slideshow.

6  Rotating the displayed picture 90° clockwise

7  Capturing an image in JPEG files.
   Refer to Capture an image in JPEG files on page 31.

1 Start slideshow when listening to another source.
Refer to Common operations for menu settings/lists on page 14.

2 Select the device containing the files that you want to display.
- Disc – Built-in DVD player
- USB – USB
- SD – SD memory card
   To cancel searching, touch Cancel.

Note
When the USB or SD source is selected, this unit cannot view still images on USB/SD as a slideshow.

Displaying still images as a slideshow.
Introduction of Bluetooth telephone operations

You can use Bluetooth telephone (AVH-P3350BT only).

 Important

- Since this unit is on standby to connect with your cellular phone via Bluetooth wireless technology, using it without the engine running can drain the battery power.
- Advanced operations that require attention such as dialing numbers on the monitor, etc., are prohibited while driving. Park your vehicle in a safe place when using these advanced operations.
- Operations available may be limited depending on the cellular phone connected to this unit.

- Be sure to park your vehicle in a safe place and apply the parking brake when performing this operation.

1. Incoming call notice
   Indicates that an incoming call has been received and has not been checked yet.
   - Not displayed for calls made when your cellular phone is disconnected from this unit.

2. Touch panel keys

Bluetooth Telephone

Adjusting the other party’s listening volume.
Refer to Adjusting the other party’s listening volume on page 40.

Accepting an incoming call.
Making a phone call, when selecting a phone number.
Switching between callers on hold.

Ending a call.
Rejecting an incoming call.
Canceling call waiting.

Accepting an incoming call
Ending a call
Press MUTE.

Notes
• Private mode can only be operated while you are talking on the phone.
• To end the call, both you and the other caller must hang up your phones.

Setting up for hands-free phoning
Before you can use the hands-free phoning function you must set up the unit for use with your cellular phone. This entails establishing a Bluetooth wireless connection between this unit and your phone, registering your phone with this unit, and adjusting the volume level.

1 Connection
First, you need to connect a Bluetooth telephone to this unit.
For detailed instructions on connecting your phone to this unit via Bluetooth wireless technology, see following section. Using a Bluetooth device to pair on page 42 and Pairing from this unit on page 41.
• You may also need to enter a PIN code into this unit. If your telephone requires a PIN code to establish a connection, look for the code on the telephone or in its accompanying documentation. Refer to Entering PIN code for Bluetooth wireless connection on page 43.

2 Volume adjustment
Adjust the earpiece volume of your cellular phone to your preference. The unit will record the adjusted volume level as the default setting.
• The volume of the caller’s voice and ring tone may vary depending on the type of cellular phone.
• If there is a large volume difference between the ring tone and caller’s voice, the overall volume level may become unstable.
• Make sure to adjust the volume to a proper level before disconnecting the cellular phone from the unit. If the volume is muted (zero level) on your cellular phone, the volume level of your cellular phone remains muted even after the cellular phone is disconnected.
Introduction of TV tuner operations

You can use this unit to control a TV tuner, such as the GEX-P5750TVP (sold separately). For details concerning operation, refer to the TV tuner’s operation manual. This section provides information on TV operations with this unit, which differs from that described in the TV tuner’s operation manual.

- Touch panel keys

1. **Wide**
   - Changing the screen mode.
   - Refer to Changing the wide screen mode on page 37.

2. **EQ**
   - Switching the equalizer curves.
   - Refer to Using the equalizer on page 47.
   - Touch and hold for more than two seconds to turn the auto-equalizer on or off.
   - Refer to Using the auto-equalizer on page 48.

3. **Displaying the preset screen.**
   - Refer to Storing and recalling stations on page 30.
   - Refer to Storing the strongest stations on page 30.

4. **Band:**
   - Selecting a band.

5. **Recalling radio station frequencies assigned to preset tuning keys.**
   - Refer to Storing and recalling stations on page 30.

### Manual tuning (step by step) using the buttons

1. Press ◀ or ▶ (TRACK/SEEK).

### Seek tuning using the buttons

1. Press and hold ◀ or ▶ (TRACK/SEEK).

### Notes

- Refer to Setting the video signal on page 67 to set the TV signal.
- Refer to Selecting the area group on page 67 to select the area group.

<QR3129-B/N>26
Introduction of Bluetooth telephone operations

During a call

Except during a call

You can control the Bluetooth telephone if you connect a Bluetooth adapter, such as the CD-BTB200 (sold separately), to the AVH-P4350DVD.

But the available features are limited.

Important

- In some countries, CD-BTB200 is not sold on the market.
- Since this unit is on standby to connect with your cellular phone via Bluetooth wireless technology, using it without the engine running can drain the battery power.
- Advanced operations that require attention such as dialing numbers on the monitor, etc., are prohibited while driving. Park your vehicle in a safe place when using these advanced operations.
- Operations available may be limited depending on the cellular phone connected to this unit.

1 Touch panel keys

1 Switching the equalizer curves. Refer to Using the equalizer on page 47.
   Touch and hold for more than two seconds to turn the auto-equalizer on or off. Refer to Using the auto-equalizer on page 48.

2 Accepting an incoming call. Making a phone call, when selecting a phone number from the dialed and received call history.

4 Displaying the received/missed call history. Selecting a phone number from the call history. Refer to Using the missed, received and dialed call lists on the optional Bluetooth adapter on page 39.

5 Displaying the dialed call history. Selecting a phone number from the call history. Refer to Using the missed, received and dialed call lists on the optional Bluetooth adapter on page 39.

6 Scrolling the phone number. Touch and hold for more than two seconds to activate connection mode on this unit and establish a Bluetooth wireless connection from your phone. Refer to Using a cellular phone to initiate a connection on page 43.
Registering connected cellular phone to take full advantage of the features available with Bluetooth wireless technology. Refer to Registering a connected cellular phone on page 44.

Touch and hold for more than two seconds to terminate the Bluetooth wireless connection.

Turning automatic answering on or off. Refer to Setting automatic answering on page 40. Touch and hold for more than two seconds to connect to a Bluetooth telephone automatically. Refer to Connecting to a Bluetooth device automatically on page 42.

Turning the ring tone for incoming calls on or off. Refer to Switching the ring tone on page 40. Touch and hold for more than two seconds to display the Bluetooth device address of your cellular phone and the Bluetooth adapter. Refer to Displaying Bluetooth Device address on page 44.

Switching between Bluetooth telephone and Bluetooth audio. Touch and hold for more than two seconds to start voice recognition. Refer to Voice recognition on page 44.

Setting up for hands-free phoning
Before you can use the hands-free phoning function you must set up the unit for use with your cellular phone. This entails establishing a Bluetooth wireless connection between this unit and your phone, registering your phone with this unit, and adjusting the volume level.

1. Connection
First, you need to connect a Bluetooth telephone to this unit. For detailed instructions on connecting your phone to this unit via Bluetooth wireless technology, see following section. Using a cellular phone to initiate a connection on page 43 and Registering a connected cellular phone on page 44.

2. Volume adjustment
Adjust the earpiece volume of your cellular phone to your preference. The unit will record the adjusted volume level as the default setting.
   - The volume of the caller’s voice and ring tone may vary depending on the type of cellular phone.
   - If there is a large volume difference between the ring tone and caller’s voice, the overall volume level may become unstable.
   - Make sure to adjust the volume to a proper level before disconnecting the cellular phone from the unit. If the volume is muted (zero level) on your cellular phone, the volume level of your cellular phone remains muted even after the cellular phone is disconnected.

Bluetooth audio operations
You can control Bluetooth audio if you connect a Bluetooth adapter, such as the CD-BTB200 (sold separately), to the AVHP4350DVD.

Important
- Depending on the Bluetooth audio player connected to this unit, the available operations will be limited to the following two levels:
  - A2DP profile (Advanced Audio Distribution Profile): You can only playback songs on your audio player.
  - AVRCP profile (Audio/Video Remote Control Profile): You can perform playback, pause playback, select songs, etc.
Using Bluetooth wireless technology

- Since there are a number of Bluetooth audio players available on the market, available operations will vary extensively. When operating your player with this unit, refer to the instruction manual that came with your Bluetooth audio player as well as this manual.
- Information related to a song (such as the elapsed playing time, song title, song index, etc.) cannot be displayed on this unit.
- As the signal from your cellular phone may cause noise, avoid using it when you are listening to songs on your Bluetooth audio player.
- When a call is in progress on the cellular phone connected to this unit via Bluetooth wireless technology, the sound of the Bluetooth audio player connected to this unit is muted.
- When the Bluetooth audio player is in use, you cannot connect to a Bluetooth telephone automatically.
- Playback continues even if you switch from your Bluetooth audio player to another source while listening to a song.

1. Touch panel keys

- Switching between Bluetooth telephone and Bluetooth audio.
- Skipping back or forward to another track when Auto is set for the auto/manual setting.
- Performing fast forward or rewind when Manual is set for the auto/manual setting.
- Pausing a song.
- Playback starts.

- Setting the action for ◀ and ▶ icons.
- Switching the equalizer curves. Refer to Using the equalizer on page 47.
- Touch and hold for more than two seconds to turn the auto-equalizer on or off. Refer to Using the auto-equalizer on page 48.

Setting up for Bluetooth audio

Before you can use the Bluetooth audio function you must set up the unit for use with your Bluetooth audio player. This entails establishing a Bluetooth wireless connection between this unit and your Bluetooth audio player, and pairing your Bluetooth audio player with this unit.

1. Connection
First, you need to connect a Bluetooth audio to this unit. For detailed instructions on connecting your Bluetooth audio to this unit via Bluetooth wireless technology, see Connecting a Bluetooth audio player on page 44.
Storing and recalling stations
You can easily store up to six(for tuner)/12(for TV) stations for each band as presets.

1 Display the preset screen.
Refer to Introduction of tuner operations on page 16.
Refer to Introduction of TV tuner operations on page 26.
The preset screen appears in the display.

2 Touch and hold one of the preset tuning keys to store the selected frequency in the memory.
The selected radio/TV station frequency has been stored in the memory.

3 Touch one of the preset tuning keys to select the desired station.

Displaying radio text
Radio text data transmitted by RDS stations, such as station information, the name of the currently broadcast song and the name of the artist, can be displayed on this tuner.
- When no radio text is received, No Text appears in the display.

Storing the strongest stations
BSM (best stations memory) automatically stores the six (for tuner)/12 (for TV) strongest stations.
Storing broadcast frequencies with BSM may replace broadcast frequencies you have saved using the preset tuning keys.

1 Display the preset screen.
Refer to Introduction of tuner operations on page 16.
Refer to Introduction of TV tuner operations on page 26.
The preset screen appears in the display.

2 Touch BSM/BSSM to turn BSM on.
The six(for tuner)/12(for TV) strongest broadcast frequencies will be stored under preset tuning keys in order of their signal strength.
- To cancel the storage process, touch Cancel.

Tuning in to strong signals
Local seek tuning lets you tune in to only those radio stations with sufficiently strong signals for good reception.

FM: off — — — — — — — — — AM: off — — — —
The larger the setting number, the higher the signal level. The highest level setting allows reception of only the strongest stations, while lower settings let you receive progressively weaker stations.

Switching the media file type
When playing a disc containing a mixture of various media file types, such as DivX and MP3, you can switch between media file types to play.
Audio data (CD-DA) and JPEG picture files on DVD-R/RW/ROM cannot be played back on this unit.

CD (audio data (CD-DA)) — Music (compressed audio) — Video (DivX video files) — Photo (JPEG picture files)

Operating the DVD menu
(Function for DVD video)
Some DVDs allow you to make a selection from the disc contents using a menu.
Detailed instructions

Using the arrow keys

1 Display arrow keys to operate the DVD menu.
Refer to Playing moving images on page 17.

2 Select the desired menu item.

Selecting the desired menu item.

Starting playback from the selected menu item.

Operating the DVD menu by directly touching the menu item.

- When operating the DVD menu by directly touching the menu item, touch the icon to operate.

Returning to the normal DVD video display.

Displaying arrow keys.

- Ways to display the menu will differ depending on the disc.
- Depending on the contents of the DVD disc, this function may not work properly. In such cases, use the touch panel keys to operate the DVD menu.

Operating this unit’s iPod function from your iPod

You can listen to the sound from your iPod applications using your car’s speakers, when

App Mode is selected with following iPod models.
- iPod nano 1st generation
- iPod 5th generation

APP mode is compatible with the following iPod models.
- iPhone 4 (software version 4.1 or later)
- iPhone 3GS (software version 4.1 or later)
- iPhone 3G (software version 4.1 or later)
- iPhone (software version 3.1.3 or later)
- iPod touch 3rd generation (software version 4.0 or later)
- iPod touch 2nd generation (software version 4.0 or later)
- iPod touch 1st generation (software version 3.1.3 or later)

- While this function is in use, the iPod will not turn off even if the ignition key is turned off. Operate the iPod to turn off the power.

1 Switch the control mode to App Mode.
Refer to Introduction of video playback operations on page 17.
Refer to Introduction of sound playback operations on page 20.

2 Operate the connected iPod to select a video/song and play.

Note
The following functions are still accessible from the unit even if the control mode is set to App Mode.
- Pausing
- Fast forwarding/reversing
- Tracking up/down
- Moving to a chapter up/down

<QRW3129-B/N>31
Random play (shuffle)

iPod-videos/songs can be played back in random order.

- **Songs** – Play back videos/songs in the selected list in random order.
- **Albums** – Play back videos/songs from a randomly selected album in order.
- **Folder** – Play back songs/tracks in the selected folder in random order.
- **Disc** – Play back songs/tracks in the selected disc in random order.
- **On** – Play back files in random order within the repeat range, **Folder** and **Disc**.
- **Off** – Cancel random play.

Playing all songs in random order (shuffle all)

(Function for iPod)

This method plays all songs on the iPod randomly.

Repeating playback

- **Disc** – Play through the current disc
- **Chapter** – Repeat the current chapter
- **Title** – Repeat the current title
- **Track** – Repeat the current track
- **File** – Repeat the current file
- **Folder** – Repeat the current folder
- **One** – Repeat just the current video/song/track
- **All** – Repeat all videos/songs in the selected list on the iPod
- **Repeat files**

- When playing discs with compressed audio and audio data (CD-DA), playback is repeated within the type of data currently playing even if **Disc** is selected.
- If you select another folder during repeat play, the repeat play range changes to **Disc**.
- If you select USB or SD source, the repeat play range changes to **All**.
- If you perform track search or fast forward/reverse during **File**, the repeat play range changes to **Folder**.
- If you perform title/chapter search or fast forward/reverse during **Chapter**, the repeat play range changes to **OFF**.
- If you perform track search or fast forward/reverse during **Track**, the repeat play range changes to **Disc**.
- When **Folder** is selected, it is not possible to play back a subfolder of that folder.

Playing videos from your iPod

(Function for iPod)

Videos can be played on this unit if an iPod with video capabilities is connected.

- This unit can play back “Movies”, “Music videos”, “Video Podcast” and “TV show” which are downloaded from the iTunes store.
- Before you display the video screen, be sure to change the video setting on the iPod so that the iPod can output the video to an external device.

1 **Display the iPod menus.**

Refer to **Playing moving images** on page 17.

2 **Switch to iPod video mode.**

   ![Switching to iPod video mode.](Switching to iPod video mode.)

3 **Play the video from the iPod.**

   - If you want to switch to iPod music mode, touch the icon.
Music

Switching to iPod music mode.

Browsing for a video/music on the iPod
(Function for iPod)
To make operating and searching easy, operations to control an iPod with this unit are designed to be as similar to the iPod as possible.

Searching for a video/music by category

1 Display the iPod menus.
Refer to Playing moving images on page 17.
Refer to Playing audio on page 20.

2 Touch one of the categories in which you want to search for a video/music.
- Video Playlists (video playlists)
- Movies (movies)
- Music Videos (music videos)
- Video Podcasts (video podcasts)
- TV Shows (TV shows)
- Playlists (playlists)
- Artists (artists)
- Albums (albums)
- Songs (songs)
- Podcasts (podcasts)
- Genres (genres)
- Composers (composers)
- Audiobooks (audiobooks)

3 Touch the title of the list that you want to play.
Repeat this operation until you find the desired video/music.

4 Start playback of the selected list.

Searching the list by alphabet
(Function for iPod)

1 Select a category.
Refer to Searching for a video/music by category on this page.

2 Switch to alphabet search mode.

ABC

Switching to alphabet search mode.

Alphabet search mode is displayed.

3 Touch the first letter of the title of the video/song you are looking for.
While searching, touch panel key operation is not available.
- To refine the search with a different letter, touch Cancel.

4 Touch the title of the list that you want to play.
Repeat this operation until you find the desired song/video.

5 Start playback of the selected list.

Resume playback (Bookmark)
(Function for DVD video)
By using the Bookmark function, you can resume playback from a selected scene the next time the disc is loaded.

The selected scene will be bookmarked so that playback resumes from that point next time.
- To clear the bookmark on a disc, touch and hold the button during playback.
- The oldest bookmark is replaced by the new one.
Frame-by-frame playback
(Function for DVD video/video CD/DivX file)

Note
Images during frame-by-frame playback may be unclear for some discs.

Slow motion playback
Notes
- There is no sound during slow motion playback.
- Images during slow motion playback may be unclear for some discs.
- Reverse slow motion playback is not available.

Searching for the part you want to play
You can use the search function to find the part you want to play.
For DVD videos, you can select Title (title), Chapter (chapter) or 10key (numeric keypad).
For video CDs, you can select Track (track) or 10key (numeric keypad).
- Chapter search is not available when disc playback is stopped.
- This function cannot be operated during some DVD videos or Video CD playback featuring PBC (playback control).

1 Start the search function.
Refer to Playing moving images on page 17.

2 Touch the desired search option (e.g., Chapter).

3 Touch 0 to 9 to input the desired number.
  - To cancel the entered numbers, touch C.

4 Start playback from the selected part.

Changing audio language during playback (Multi-audio)
With DVDs/DivX files that provides audio playback in different languages and different audio systems (Dolby Digital, DTS, etc.), you can switch between languages/audio systems during playback.

Notes
- With some DVDs, switching between languages/audio systems may only be possible using a menu display.
- You can also switch between languages/audio systems using Video Setup. For details, refer to Setting the audio language on page 60.
- Only digital output of DTS audio is possible. If the unit’s optical digital outputs are not connected, select an audio setting other than DTS.
- Depending on the setting, the video may not be played back with the audio system used to record the DVD.
- You will return to normal playback if you change the Audio during fast forward/fast rewind, pause or slow motion playback.

Changing the subtitle language during playback (Multi-subtitle)
With DVDs/DivX files featuring multi-subtitle recordings, you can switch between subtitle languages during playback.
Notes
- With some DVDs, switching between subtitle languages may only be possible using a menu display.
- You can also switch between subtitle languages using Video Setup. For details, refer to Setting the subtitle language on page 60.
- You will return to normal playback if you change the Subtitle during fast forward/fast rewind, pause or slow motion playback. ■

Changing the viewing angle during playback (Multi-angle)
With DVDs featuring multi-angle (scenes shot from multiple angles) recordings, you can switch among viewing angles during playback.
- During playback of a scene shot from multiple angles, the angle icon is displayed. Use the Video Setup to turn the angle icon display on or off. For details, refer to Setting the multi-angle DVD display on page 61.

Note
You will return to normal playback if you change the viewing angle during fast forward/fast rewind, pause or slow motion playback. ■

Return to the specified scene
(Function for DVD video)
This function cannot be used if a specified scene has not been preprogrammed on the DVD disc. ■

Selecting audio output
When playing DVD video discs recorded with LPCM audio, you can switch the audio output. When playing video CDs, you can switch between stereo and monaural audio output.
- This function is not available when disc playback is stopped.
- If you select Linear PCM, you can operate this function when playing a disc recorded on a dual mono mode. (Refer to Setting for digital output on page 63.)
- L+R – left and right
- Left – left
- Right – right
- Mix – mixing left and right

You may not be able to select or use this function depending on the disc and the playback location. ■

PBC playback
(Function for Video CDs)
During playback of Video CDs featuring PBC (Playback Control), PBC ON is displayed.

1 Start the search function.
Refer to Playing moving images on page 17.

2 Touch 10key to display the numeric keypad.

3 Touch 0 to 9 corresponding to a menu number.

4 Start playback from the selected part.

Registering the numbers and starting playback.

Notes
- You can display the menu by touching Return during PBC playback. For details, refer to the instructions provided with the disc.
- PBC playback of a Video CD cannot be canceled.
- During playback of Video CDs featuring PBC (Playback Control), you cannot select the repeat play range or use the search function. ■
Selecting tracks from the track title list

You can select tracks to playback using the track title list which is a list of the tracks recorded on a disc.

1 Display the track title list.
   Refer to Playing audio on page 20.

2 Touch your favorite track title.
   Playback begins.

Selecting files from the file name list

(Function for USB/SD/DivX)

File name list is a list of file names (or folder names) from which you can select a file (or folder) to play back.

1 Display the file (or folder) name list.
   Refer to Playing audio on page 20.
   Refer to Introduction of still image playback operations on page 22.

2 Touch your favorite file (or folder) name.
   ▪ When you have selected a folder, a list of the names of the files (or the folders) in it can be viewed. Repeat this operation to select the desired file name.
   ▪ If folder 01 (ROOT) contains no files, playback commences with folder 02.

3 Start playback of the selected list.

Using advanced sound retriever

Automatically enhances compressed audio and restores rich sound.

Off — ■ — ■ ■
   • ■ ■ is more effective than ■ ■.

Note

When you use this unit with a multi-channel processor (DEQ-P7650/DEQ-P6600) and switch the advanced sound retriever function to ■ ■ or ■ ■, the volume will become slightly lower. The volume will become much lower for ■ ■ than it will for ■ ■. Take care when you increase the volume for ■ ■ and then switch to Off, because the volume will suddenly seem much louder.

Changing audiobook speed

(Function for iPod)

■ ■ — Playback at a speed faster than normal
■ — Playback at normal speed
■ ■ — Playback at a speed slower than normal

Displaying lists related to the currently playing song (Link Search)

(Function for iPod)

1 Start Link Search.
   Refer to Introduction of sound playback operations on page 20.

2 Touch one of the categories in which you want to play.
   ▪ Artist — Displays an album list of the artist currently being played.
   ▪ Album — Displays a song list from the album currently being played.
   ▪ Genre — Displays an album list from the genre currently being played.
To cancel searching, touch Cancel.

3  Touch the title of the list that you want to play.

4  Start playback of the selected list.

Starting playback of the selected list.

Playing DivX® VOD content

Some DivX VOD (video on demand) content may only be playable a fixed number of times. When you load a disc containing this type of content, the remaining number of times it can be played is shown on-screen. You can then decide whether or not to play the disc.

- If there is no limit to the number of times the DivX VOD content can be viewed, then you may load the disc into your player and play the content as often as you like, and no message will be displayed.
- You can confirm the number of times that the content can be played by checking the number displayed after Remaining Views:

Important

- In order to play DivX VOD contents on this unit, you first need to register the unit with your DivX VOD contents provider. For details on your registration code, refer to Displaying the DivX® VOD registration code on page 63.

- DivX VOD content is protected by a DRM (Digital Rights Management) system. This restricts playback of content to specific, registered devices.

- If a message is displayed after loading a disc containing DivX VOD content, touch Play.

Playback of the DivX VOD content will start.

- To skip to the next file, touch Next Play.
- If you do not want to play the DivX VOD content, touch Stop.

Capture an image in JPEG files

You can capture image data and use it as wallpaper. Images can be stored and recalled easily in this unit.

- Only one image can be stored on this unit.
- Old images are overwritten with the new ones.

1  Pause the slideshow when the desired image is displayed.

Refer to Introduction of still image playback operations on page 22.

Refer to Introduction of still image playback as a slideshow operations on page 23.

2  Capture the image.

Refer to Introduction of still image playback operations on page 22.

Refer to Introduction of still image playback as a slideshow operations on page 23.

3  When Do you save this image? is displayed, touch Yes.

While storing the image to this unit, Saving the image Don't switch off the battery. is displayed. When the process is finished, Image saved. is displayed.

- To cancel the storage process, touch No.

Changing the wide screen mode

You can select a desired mode for enlarging a 4:3 picture to a 16:9 picture.

1  Display the screen mode.

Refer to Introduction of video playback operations on page 17.

Refer to Introduction of still image playback operations on page 22.

Refer to Introduction of still image playback as a slideshow operations on page 23.

2  Touch the desired wide mode setting.
Full (full screen)
The 4:3 picture is enlarged in the horizontal direction only, giving you a 4:3 TV picture (normal picture) without any omissions.

Just (just)
The picture is enlarged slightly at the center and the amount of enlargement increases horizontally toward the edges of the screen, enabling you to enjoy a 4:3 picture without sensing any disparity even when viewing on a wide screen.

Cinema (cinema)
The picture is enlarged by the same proportion as Full or Zoom in the horizontal direction and by an intermediate proportion between Full and Zoom in the vertical direction; ideal for a cinema-sized picture (wide screen picture) where captions lie outside the picture.

Zoom (zoom)
The 4:3 picture is enlarged in the same proportion both vertically and horizontally; ideal for a cinema-sized picture (wide screen picture).

Normal (normal)
The 4:3 picture is displayed as it is, giving you no sense of disparity since its proportions are the same as that of the normal picture.

Notes
- You cannot operate this function while driving.
- Different settings can be stored for each video source.
- When a video is viewed in a wide screen mode that does not match its original aspect ratio, it may appear different.
- Remember that using the wide mode feature of this system for commercial or public viewing purposes may constitute an infringement on the author’s rights protected by the Copyright Law.
- The video image will appear coarser when viewed in Cinema or Zoom mode.

Calling a number in the phone book
(Function of AVH-P3350BT)
The phone book in your cellular phone will be transferred automatically when the phone is connected to this unit.
After finding the number you want to call in the phone book, you can select the entry and make the call.

1 Switch to phone book mode.
Refer to Introduction of Bluetooth telephone operations on page 24.
The phone book display appears.

2 Select the phone number list.
The detailed phone number list of the selected entry is displayed.

3 Select the phone number.
- If you want to store the phone number, touch and hold the list.

4 Make the call.
Refer to Introduction of Bluetooth telephone operations on page 24.

5 End the call.
Refer to Introduction of Bluetooth telephone operations on page 24.

Note
Depending on the cellular phone, the phone book may not be transferred automatically. In this case, operate your cellular phone to transfer the phone book. The visibility of this unit should be on. Refer to Switching visible unit on page 43.

Selecting a number by alphabet search mode
(Function of AVH-P3350BT)
If a lot of numbers are registered in the phone book, you can search for the phone number by alphabet search mode.
1 Switch to phone book mode. Refer to Introduction of Bluetooth telephone operations on page 24. The phone book display appears.

2 Touch ABC to switch to alphabet search mode.

3 Touch the first letter of the entry you are looking for. The Phone Book entries starting with that letter (e.g. “Ben”, “Brian” and “Burt” when “B” is selected) will be displayed.
   - If you want to change the character to Russian, touch the icon. To return to English, touch the icon again.

   ![Changing the character to Russian](image)

   - The order of the first name and last name may be different from that of the cellular phone.

4 Touch the list to display the phone number list of the selected entry.
   - If several phone numbers are included in an entry, select one by touching the list.
   - If you want to switch to the call history list, touch the icon.

   ![Switching to the call history list](image)

5 Make the call. Refer to Introduction of Bluetooth telephone operations on page 24.

6 End the call. Refer to Introduction of Bluetooth telephone operations on page 24.

Using the missed, received and dialed call lists
(Function of AVH-P3350BT)

The 80 most recent calls dialed, received, and missed are stored in the memory. You can browse them and call numbers from these lists.

1 Switch to the call history list. Refer to Introduction of Bluetooth telephone operations on page 24.

2 Select Missed Calls, Dialed Calls or Received Calls.

3 Touch the list number to select a phone number. Name and phone number are displayed in the detailed list.
   - If you want to store the phone number, touch and hold the list.

4 Make the call. Refer to Introduction of Bluetooth telephone operations on page 24.

5 End the call. Refer to Introduction of Bluetooth telephone operations on page 24.

Using the missed, received and dialed call lists on the optional Bluetooth adapter
(Function of AVH-P4350DVD)

The 80 most recent calls dialed, received, and missed are stored in the memory. You can browse them and call numbers from these lists.
1 Switch to the call history list.
Refer to Introduction of Bluetooth telephone operations on page 27.

2 Touch a phone number or name (if entered) you want to call.

3 Make the call.
Refer to Introduction of Bluetooth telephone operations on page 27.

4 End the call.
Refer to Introduction of Bluetooth telephone operations on page 27.

Setting automatic answering
If this function is on, this unit automatically answers all incoming calls.

- Turn automatic answering on or off.
  (AVH-P4350DVD)
  Refer to Introduction of Bluetooth telephone operations on page 27.
  (AVH-P3350BT)
  Refer to Introduction of Bluetooth telephone operations on page 24.

Adjusting the other party’s listening volume
(Function of AVH-P3350BT)
To maintain the good sound quality, this unit can adjust the other party’s listening volume. If the volume is not loud enough for the other party, use this function.

- Select Far-End VOL.
  Refer to Introduction of Bluetooth telephone operations on page 24.
  1—2—3
  ■ This function can be performed even while talking on the phone.
  ■ Settings can be stored for each device.

Switching the ring tone
You can select whether or not to use this unit’s ring tone. If this function is set to on, the ring tone for this unit will sound.

1 Connect your cellular phone to this unit.

2 Turn ring tone on or off.
  (AVH-P4350DVD)
  Refer to Introduction of Bluetooth telephone operations on page 27.
  (AVH-P3350BT)
  Refer to Introduction of Bluetooth telephone operations on page 24.

Using the preset dial lists
(Function of AVH-P3350BT)
You can easily store up to six phone numbers as presets.

1 Display the preset screen.
  Refer to Introduction of Bluetooth telephone operations on page 24.

2 Touch one of preset dial keys to select the desired phone number.
  ■ If you want to delete a preset phone number, touch and hold the preset dial key.

3 Make the call.
  Refer to Introduction of Bluetooth telephone operations on page 24.

4 End the call.
  Refer to Introduction of Bluetooth telephone operations on page 24.
Making a call by entering phone number
(Function of AVH-P3350BT)

1. Switch to the entering phone number mode.
   Refer to Introduction of Bluetooth telephone operations on page 24.

2. Touch the number icons to input the numbers.
   - Up to 24 digits can be entered.

3. Make the call.
   Refer to Introduction of Bluetooth telephone operations on page 24.

4. End the call.
   Refer to Introduction of Bluetooth telephone operations on page 24.

Note
Entering phone number mode cannot be operated unless a Bluetooth telephone is connected to this unit.

Setting the private mode
(Function of AVH-P3350BT)
During a conversation, you can switch to private mode (talk directly on your cellular phone).
Refer to Introduction of Bluetooth telephone operations on page 24.

Pairing from this unit
(Function of AVH-P3350BT)

1. Display the Bluetooth Connection Menu.
   Refer to Introduction of Bluetooth telephone operations on page 24.

2. Touch Connection to select a device.

3. Start to search.

   Starting to search.

   While searching, is displayed and when available devices are found, the device names or Bluetooth device addresses (if names cannot be obtained) are displayed.
   - If you want to switch between the device names and Bluetooth device addresses, touch the icon.

   Switching between the device names and Bluetooth device addresses.

   - To cancel searching, touch Stop.
   - If five devices are already paired, Memory Full is displayed and pairing cannot be performed. In such cases, delete a paired device first. Refer to the next page.
   - If no device can be found, Not Found is displayed. In such cases, check the status of the Bluetooth device and search again.

4. Touch a device name to select the device you want to connect to.
   While connecting, Pairing is displayed. If the connection is established, Paired is displayed.
If the connection fails, Error is displayed. In such cases, try again from the beginning.

The PIN code is set to 0000 as the default, but can be changed. Refer to Entering PIN code for Bluetooth wireless connection on the next page.

When establishing connection, the icon is displayed. Touch the icon to disconnect the device.

Disconnecting a Bluetooth device.

If you want to delete a paired Bluetooth telephone, display Delete OK?. Touch Yes to delete the device.

Deleting a paired device.

Never turn the unit off while the paired Bluetooth telephone is being deleted.

Using a Bluetooth device to pair
(Function of AVH-P3350BT)
If you cannot open the connection between your Bluetooth device and this unit from your Bluetooth device, you can use this function to establish a connection.

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 24.

2 Touch Special Device to select the special device.
- Bluetooth devices that are difficult to establish a connection with are called special devices. If your Bluetooth device is listed as a special device, select the appropriate one.

3 Touch the special device list to open the connection.
This unit is now on standby for a connection with the Bluetooth device.
- If five devices are already paired, Memory Full is displayed and pairing cannot be performed. In such cases, delete a paired device first. Refer to this page.

4 Use your Bluetooth device to establish a connection.
The connection method is different depending on the Bluetooth device. Refer to the manual for your Bluetooth device to establish a connection.
While connecting, Pair your phone is displayed. If the connection is established, Paired is displayed.
- If the connection fails, Error is displayed. In such cases, try again from the beginning.
- The PIN code is set to 0000 as the default, but can be changed. Refer to Entering PIN code for Bluetooth wireless connection on the next page.

Connecting to a Bluetooth device automatically
(Function of AVH-P3350BT)
If this function is set to on, a connection between your Bluetooth device and this unit will take place automatically as soon as the two devices are less than a few meters apart. Initially, this function is set to on.

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 24.

2 Touch Auto Connect to turn automatic connection on.
If your Bluetooth device is ready for a Bluetooth wireless connection, a connection to this unit will automatically be established.
Detailed instructions

To turn automatic connection off, touch Auto Connect again.

3 Turn your vehicle’s ACC switch off and on.

Switching visible unit
(Function of AVH-P3350BT)
This function sets whether or not to make this unit visible to the other device. Initially, this function is set to on.

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 24.

2 Touch Visibility to select visibility off.
• To turn visibility on, touch Visibility again.

Displaying Bluetooth Device address
(Function of AVH-P3350BT)
This unit displays its Bluetooth device address.

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 24.

2 Touch Device Information to display device information.
The Bluetooth device address is displayed.

Entering PIN code for Bluetooth wireless connection
(Function of AVH-P3350BT)
To connect your Bluetooth device to this unit via Bluetooth wireless technology, you need to enter a PIN code on your Bluetooth device to verify the connection. The default code is 0000, but you can change it with this function.

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 24.

2 Touch PIN Code Input to select PIN code input.

3 Touch 1 to 0 to input pin code.

4 After inputting PIN code (up to 8 digits), store in this unit.

Using a cellular phone to initiate a connection
(Function of AVH-P4350DVD)
A Bluetooth wireless connection can be established from your phone by putting the unit into initiating a connection mode. You may need to refer to the operation manual that came with your phone if you are unsure how to initiate a connection from your phone.

1 Put the unit in initiating a connection mode.
Refer to Introduction of Bluetooth telephone operations on page 24.

2 Use a cellular phone to connect to this unit.
• Operation varies depending on the type of cellular phone.
• You may need to enter the link code on your cellular phone to complete the connection.
Registering a connected cellular phone
(Function of AVH-P4350DVD)
You can register a phone that is temporarily connected to this unit in order to take full advantage of the features available with Bluetooth wireless technology. Only one cellular phone can be registered.

1 Start registering a connected cellular phone.
Refer to Introduction of Bluetooth telephone operations on page 27.

2 Use cellular phone to register to this unit.
If registration is successful, the device name of the connected phone is displayed in the selected assignment.
- If the assignment is already taken, the device name will be displayed. To replace an assignment with a new phone, first delete the current assignment.
- If registration failed, the device name of the connected phone will not be displayed in the selected assignment. In such cases, return to step 1 and try again.

Voice recognition
(Function of AVH-P4350DVD)
If your cellular phone features voice recognition technology, you can make a call by voice commands.
- Operation varies depending on the type of cellular phone. Refer to the instruction manual that came with your cellular phone for detailed instructions.

1 Start voice recognition.
Refer to Introduction of Bluetooth telephone operations on page 27.

2 Say the name of your contact aloud.

Connecting a Bluetooth audio player
(Function of AVH-P4350DVD)
A Bluetooth wireless connection can be established by putting the unit into initiating a connection mode.

1 Put the unit in initiating a connection mode.
Refer to Bluetooth audio operations on page 28.
This unit is now on standby for connection from Bluetooth audio player. If your Bluetooth audio player is set ready for Bluetooth wireless connection, connection to this unit is automatically established.

Connecting to a Bluetooth device automatically
(Function of AVH-P4350DVD)
If this function is set to on, a connection between your Bluetooth device and this unit will take place automatically as soon as the two devices are less than a few meters apart. Initially, this function is set to on.

1 Touch Auto Connect to turn automatic connection on.
Refer to Introduction of Bluetooth telephone operations on page 27.
If your Bluetooth device is ready for a Bluetooth wireless connection, a connection to this unit will automatically be established.
- To turn automatic connection off, touch Auto Connect again.

2 Turn your vehicle’s ACC switch off and on.

Displaying Bluetooth Device address
(Function of AVH-P4350DVD)
This unit displays its Bluetooth Device address.
● Touch Device Information to display device information.
Refer to Introduction of Bluetooth telephone operations on page 27.
The Bluetooth Device address is displayed.
Section 13

Menu operations

Introduction of menu operations

1 Display menus.
   Refer to Common operations for menu settings/lists on page 14.

2 Touch any of the following touch panel keys to select the menu to be adjusted.
   - Touch panel keys

   1 Video Setup Menu
      Refer to Setting up the DVD player on page 60.

   2 Audio function menu
      Refer to Audio Adjustments on the next page.
      DSP function menu
      Refer to Introduction of DSP adjustments on page 50.

   3 System menu
      Refer to System settings on page 64.

   4 Entertainment menu
      Refer to Entertainment settings on page 70.

   5 Custom menu
      You can choose menus within each menu (Audio function menu, etc.) and register them to this custom menu.
      Refer to Customizing menus on page 71.

Notes
- If the multi-channel processor (DEQ-P7650/DEQ-P6600) is connected to this unit, the audio function will change according to the multi-channel processor’s audio menu. For details, refer to Introduction of DSP adjustments on page 50.
- You can display the Video Setup when a Disc USB or SD source is selected.
- If you start the Video Setup, playback is stopped.
- You cannot display the Audio/DSP function menu when the mute function is on or a JPEG file is playing.

<QRB3129-B/N>46
Audio Adjustments

Note
When selecting FM as the source, you cannot switch to Source Level Adjuster.

Using fader/balance adjustment
You can change the fader/balance setting to provide an ideal listening environment for all of the occupied seats.

1 Display the audio function menu. Refer to Introduction of menu operations on the previous page.

2 Touch Fader/Balance on the audio function menu.

3 Touch ▲ or ▼ to adjust the front/rear speaker balance. Range: Front:15 to Rear:15
   - Select F/R: 0 L/R: 0 when only using two speakers.
   - The front/rear speaker balance cannot be adjusted when the rear output setting is Subwoofer. Refer to Setting the rear output and subwoofer controller on page 64.

4 Touch ◀ or ▶ to adjust the left/right speaker balance. Range: Left:15 to Right:15

Using the equalizer
You can adjust the equalization to match the car’s interior acoustic characteristics as desired.

Recalling equalizer curves
There are seven stored equalizer curves which you can easily recall at any time. Here is a list of the equalizer curves.

<table>
<thead>
<tr>
<th>Display</th>
<th>Equalizer curve</th>
</tr>
</thead>
<tbody>
<tr>
<td>Powerful</td>
<td>Powerful</td>
</tr>
<tr>
<td>Natural</td>
<td>Natural</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Display</th>
<th>Equalizer curve</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vocal</td>
<td>Vocal</td>
</tr>
<tr>
<td>Custom1</td>
<td>Custom 1</td>
</tr>
<tr>
<td>Custom2</td>
<td>Custom 2</td>
</tr>
<tr>
<td>Flat</td>
<td>Flat</td>
</tr>
<tr>
<td>Super Bass</td>
<td>Super bass</td>
</tr>
</tbody>
</table>

- The equalizer curves for Custom1 and Custom2 can be adjusted.
- You cannot select Custom1 and Custom2 when using the auto-equalizer.
- When Flat, no changes are made to the sound. You can check the effects of the equalizer curves by switching alternatively between Flat and another equalizer curve.

1 Display the audio function menu. Refer to Introduction of menu operations on the previous page.

2 Touch Graphic EQ on the audio function menu.
   - You can select Graphic EQ when Auto EQ function is off.

3 Touch ◀ or ▶ to select the desired item. Powerful—Natural—Vocal—Custom1—Custom2—Flat—Super Bass

Adjusting the 8-band graphic equalizer
You can adjust the level of each band for the equalizer curves.
- A separate Custom1 curve can be created for each source. If you make adjustments when a curve other than Custom2 is selected, the equalizer curve settings will be recorded in Custom1.
- A Custom2 curve that is common for all sources can be created. If you make adjustments when the Custom2 curve is selected, the Custom2 curve will be updated.

1 Display the audio function menu. Refer to Introduction of menu operations on the previous page.
Menu operations

2 Touch Graphic EQ on the audio function menu.

3 Touch ◀ or ▶ to select the desired item.
Powerful—Natural—Vocal—Custom1—Custom2—Flat—Super Bass

4 Touch the Equalizer band to adjust.

5 Touch ▲ or ▼ to adjust the level of the equalizer band.
Range: +12dB to –12dB
- You can then select another band and adjust the level.

Using the auto-equalizer

The auto-equalizer is an equalizer curve created by auto EQ (refer to Auto EQ (auto-equalizing) on page 67).
You can turn the auto-equalizer on or off.
If you connect an optional microphone to this unit, you can use this function.

1 Display the audio function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Auto EQ to turn the auto-equalizer on or off.
- You cannot use this function if auto EQ has not been carried out.

Using sonic center control

Sound that is suited for the listening position can easily be created with this function.

1 Display the audio function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Sonic Center Control on the audio function menu.

3 Touch ◀ or ▶ to select a desired level.
Off (off)—Low (low)—Mid (mid)—High (high)

Adjusting loudness

Loudness compensates for deficiencies in the low- and high-frequency ranges at low volume.

1 Display the audio function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Loudness on the audio function menu.

3 Touch ◀ or ▶ to select a desired level.
Off (off)—Low (low)—Mid (mid)—High (high)

Using subwoofer output

This unit is equipped with a subwoofer output which can be turned on or off.
- The cut-off frequency and output level can be adjusted when the subwoofer output is on.

1 Display the audio function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Subwoofer on the audio function menu.

3 Touch On or Off next to Subwoofer to turn the subwoofer output on or off.

4 Touch Normal or Reverse next to Phase to select the phase of subwoofer output.

5 Touch ◀ or ▶ next to Level to adjust the output level of the subwoofer.
Range: +6 to –24

6 Touch ◀ or ▶ next to Frequency to select the cut-off frequency.
50Hz—63Hz—80Hz—100Hz—125Hz
Only frequencies lower than those in the selected range are outputted from the subwoofer.
**Menu operations**

**Boosting the bass**
You can boost the bass level.

1. Display the audio function menu.
   Refer to *Introduction of menu operations* on page 46.
2. Touch ▼ or ▲ to select a desired level.
   Range: 0 to +6

**Using the high pass filter**
When you do not want low sounds from the subwoofer output frequency range to play from the front or rear speakers, turn on the HPF (high pass filter). Only frequencies higher than those in the selected range are output from the front or rear speakers.

1. Display the audio function menu.
   Refer to *Introduction of menu operations* on page 46.
2. Touch ▼ or ▲ next to Frequency to select cut-off frequency.
   Off (off)—50Hz—63Hz—80Hz—100Hz—125Hz
   Only frequencies higher than those in the selected range are output from the front or rear speakers.

**Adjusting source levels**
With SLA (source level adjustment), the volume levels of each source can be adjusted to prevent significant differences between sources.
- Settings are based on the FM volume level, which remains unchanged.

1. Display the audio function menu.
   Refer to *Introduction of menu operations* on page 46.
2. Compare the FM volume level with the level of the source you wish to adjust.
3. Touch Source Level Adjuster on the audio function menu.
4. Touch ▲ or ▼ to adjust the source volume.
   Range: +4 to –4

**Notes**
- The AM volume level can also be adjusted with this function.
- Video CD, CD, compressed audio and DivX are automatically set to the same source level adjustment volume.
- iPod and USB storage device are automatically set to the same source level adjustment volume.
- External unit 1 and external unit 2 are automatically set to the same source level adjustment volume.
**Digital Signal Processor**

**Introduction of DSP adjustments**

You can use this unit to control a DEQ-P7650/DEQ-P6600 multi-channel processor (sold separately).

By carrying out the following settings/adjustments in the order shown, you can effortlessly create a finely-tuned sound field.

1. Setting the speaker setting
2. Using the position selector
3. Auto TA and EQ (auto-time alignment and auto-equalizing)
4. Adjusting time alignment
5. Adjusting the speaker output levels using a test tone
6. Selecting a cross-over frequency
7. Adjusting the speaker output levels
8. Adjusting the 3-band parametric equalizer

**Notes**

- You cannot use the audio functions when playing discs recorded at a sampling frequency higher than 96 kHz. The equalizer curve setting, Position, Auto EQ and Auto TA will also be canceled.
- Sound is only emitted from front speakers when playing discs recorded at a sampling frequency higher than 96 kHz.
- When selecting FM as the source, you cannot switch to Source Level Adjuster.
- You can only switch to Dynamic Range Control when you are playing DVD discs.
- You can only switch to Time Alignment when either Front-L or Front-R is selected in Position.
- When the speaker setting for both the center and rear speakers are set to OFF, you cannot switch to Dolby Pro Logic II.
- When the multi-channel processor (DEQ-P7650/DEQ-P6600) is connected to this unit, you cannot use MUTE function.

**Using the position selector**

One way to assure a more natural sound is to optimize the stereo image and place you right in the center of the sound field. With the position selector function, you can automatically adjust the speaker output levels and insert a delay time to match the number and position of the occupied seats. When used in conjunction with the SFC, this feature will make the sound image more natural and offer a panoramic sound that envelops you.

1. Display the DSP function menu.
   Refer to Introduction of menu operations on page 46.

2. Touch Position on the DSP function menu.

3. Touch ◄/►/▲/▼ to select a listening position.

<table>
<thead>
<tr>
<th>Key</th>
<th>Display</th>
<th>Position</th>
</tr>
</thead>
<tbody>
<tr>
<td>◄</td>
<td>Front-L</td>
<td>Left front seat</td>
</tr>
<tr>
<td>►</td>
<td>Front-R</td>
<td>Right front seat</td>
</tr>
<tr>
<td>▲</td>
<td>Front</td>
<td>Front seats</td>
</tr>
<tr>
<td>▼</td>
<td>All</td>
<td>All seats</td>
</tr>
</tbody>
</table>

- To cancel the selected position, touch the same key again.

**Note**

When adjustments are made to the listening position, the speaker outputs are automatically set to the appropriate levels. To tailor the levels more precisely, refer to Adjusting the speaker output levels using a test tone on page 55 or Adjusting the speaker output levels on page 54.

**Using fader/balance adjustment**

You can change the fader/balance setting to provide an ideal listening environment for all of the occupied seats.
1 Display the DSP function menu. Refer to Introduction of menu operations on page 46.

2 Touch Fader/Balance on the DSP function menu.

3 Touch ▲ or ▼ to adjust the front/rear speaker balance. Range: Front: 25 to Rear: 25
   • Select F/R: 0 L/R: 0 when only using two speakers.

4 Touch ◀ or ▶ to adjust the left/right speaker balance. Range: Left: 25 to Right: 25

Using sound field control
The SFC function creates the sensation of a live performance.
• The acoustics of performance spaces differ depending on the extent and contour of space through which sound waves can move and on how the created sounds bounce off the stage, walls, floors and ceilings. At a live performance you hear music in three stages: direct sound, early reflections, and late reflections, or reverberations. These factors are programmed into the SFC circuitry to recreate the acoustics of various performance settings.

1 Display the DSP function menu. Refer to Introduction of menu operations on page 46.

2 Touch SFC on the DSP function menu to select the setting. Musical (Musical)—Drama (Drama)—Action (Action)—Jazz (Jazz)—Hall (Hall)—Club (Club)—Off (Off)

Note
If the source is a 2-channel LPCM or Dolby Digital audio source, we recommend turning Dolby Pro Logic II on when selecting SFC effects that are most suitable for 5.1-channel audio sources (such as Musical, Drama or Action). On the other hand, when selecting SFC effects that are suitable for 2-channel audio sources (such as Jazz, Hall or Club), we recommend turning Dolby Pro Logic II off.

Adjusting source levels
With SLA (source level adjustment), the volume levels of each source can be adjusted to prevent significant differences between sources.
• Settings are based on the FM volume level, which remains unchanged.

1 Compare the FM volume level with the level of the source you wish to adjust.

2 Display the DSP function menu. Refer to Introduction of menu operations on page 46.

3 Touch Source Level Adjuster on the DSP function menu.

4 Touch ▲ or ▼ to adjust the source volume.

Notes
• The AM volume level can also be adjusted with this function.
• Video CD, CD, compressed audio and DivX are automatically set to the same source level adjustment volume.
• External unit 1 and external unit 2 are automatically set to the same source level adjustment volume.
Using dynamic range control
The dynamic range refers to the difference between the smallest and largest sounds emitted. Dynamic range control compresses this difference so that the sounds can be heard clearly even at low volume levels.
- The dynamic range control is only effective for Dolby Digital sound.
- You can only switch to Dynamic Range Control when you are playing DVD discs.

1 Display the DSP function menu. Refer to Introduction of menu operations on page 46.
2 Touch Dynamic Range Control on the DSP function menu.
3 Touch ► to turn dynamic range control on.
   ■ To turn dynamic range control off, touch ◄.

Using the down-mix function
Multi-channel audio can be played back in 2-channels with the down-mix function.

1 Display the DSP function menu. Refer to Introduction of menu operations on page 46.
2 Touch Down Mix on the DSP function menu.
3 Touch ◄ or ► to select the desired level.
   - Lo/Ro – Stereo mixing the original audio data that does not contain channel modes such as surround sound components.
   - Lt/Rt – Down mixing so that the surround sound components can be restored (decoded).

Using direct control
You can override the audio settings to check their effectiveness.

- When direct control is on, all audio functions except VOLUME/VOL and Dolby Pro Logic II are locked.

1 Display the DSP function menu. Refer to Introduction of menu operations on page 46.
2 Touch Digital Direct on the DSP function menu.
3 Touch ► to turn the direct control on.
   ■ To turn direct control off, touch ◄.

Using Dolby Pro Logic II
Dolby Pro Logic II creates five full-bandwidth output channels from two-channel sources to achieve high-purity matrix surround sound.
- Dolby Pro Logic II supports stereo sources with a sampling rate of up to 48 kHz and has no effect on other types of sources.
- When the speaker setting for both the center and rear speakers are set to OFF, you cannot switch to Dolby Pro Logic II.

1 Display the DSP function menu. Refer to Introduction of menu operations on page 46.
2 Touch Dolby Pro Logic II.
3 Touch any of the following touch panel keys to select the desired mode.
   - Movie – Suitable for movie playback
   - Music – Suitable for music playback
   - Matrix – Suitable when FM radio reception is weak
   - Music Adjust – Enables adjusting the Music mode
   - Off – Turns Dolby Pro Logic II off
   ■ You can only operate Music Adjust when Music has been selected.

Adjusting the Music mode
You can adjust the Music mode with the following three controls.
Panorama extends the front stereo image to include the surround speakers for an exciting “wraparound” effect.

Dimension gradually adjusts the sound field either towards the front or rear.

Center Width Control positions center-channel sounds between the center, left and right speakers. It improves the left-center-right stage presentation for both the driver and front passenger.

1 Display the DSP function menu. Refer to Introduction of menu operations on page 46.

2 Touch Dolby Pro Logic II.

3 Touch Music and then touch Music Adjust.
   • You can only operate Music Adjust when Music has been selected.

4 Touch ▲ or ▼ to select Panorama (panorama).
   Panorama (panorama)—Dimension (dimension)—Center Width (center width)

5 Touch ► to turn panorama control on.
   • To turn panorama control off, touch ◀.

6 Touch ▼ to select Dimension and then touch ◀ or ► to adjust the front/rear speaker balance.
   Range: +3 to –3

7 Touch ▼ to select Center Width and then touch ◀ or ► to adjust the center image.
   Range: 0 to 7
   The default setting is 3 and is recommended for most recordings. When set to 0, all center sound is placed in the center speaker. When set to 7, center sound is equally placed in the left and right speakers.

Setting the speaker setting
Be sure to adjust the speaker settings, such as size (bass capacity), according to the speakers installed. Set the size to Large (large) if the speaker is capable of reproducing sounds of about 100 Hz and below. Otherwise, select Small (small).

• Low frequency sound is not emitted if the subwoofer is set to Off and the front and rear speakers are set to Small or Off.

• It is imperative that speakers that are not installed be set to Off.

• Set the front or rear speaker to Large if the speaker is capable of reproducing bass content, or if no subwoofer is installed.

1 Display the DSP function menu. Refer to Introduction of menu operations on page 46.

2 Touch Speaker Setting.

3 Touch ▲ or ▼ to select the speaker to be adjusted.
   Front (front speakers)—Center (center speaker)—Rear (rear speakers)—Subwoofer (subwoofer)—Phase (subwoofer setting)
   • You can only switch to Phase when the subwoofer has been set to On.

4 Touch ◀ or ► to select the correct size for the selected speaker.
   Off (off)—Small (small)—Large (large)
   • You cannot select Off when Front (front speakers) has been selected.

   • You can select On or Off when Subwoofer (subwoofer) has been selected.

   • You can switch Reverse (reverse phase) or Normal (normal phase) when Phase (subwoofer setting) has been selected.

Correcting the subwoofer’s phase
If boosting the bass output from the subwoofer is not effective or you feel that the bass is becoming less clear, the subwoofer output and bass content emitted from the other speakers may be canceling each other out.
1 Display the DSP function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Speaker Setting.

3 Touch ▲ or ▼ to select Subwoofer (subwoofer).
   Front (front speakers)—Center (center speaker)—Rear (rear speakers)—Subwoofer (subwoofer)—Phase (subwoofer setting)

4 Touch ► to turn subwoofer output on.
   - To turn subwoofer output off, touch ◄.

5 Touch ▼ and then touch ◄ or ► to select the phase of subwoofer output.
   Reverse—Normal

Note
When playing a 2-channel mono source with Dolby Pro Logic II turned on:
- No sound is emitted if the center speaker setting is Small or Large and no center speaker is installed.
- Sound is only emitted through the center speaker if it is installed and set to Small or Large.

Adjusting the speaker output levels
Fine adjustments of the speaker output level can be made by listening to audio output. First, use the test tone to adjust the speaker to an approximate level, and then use this function to make fine adjustments.

1 Display the DSP function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Speaker Level.

3 Touch ▲ or ▼ to select the speaker to be adjusted.
   Front—Center—Rear—Subwoofer
   Rear-R (right rear speaker)—Rear-L (left rear speaker)—Subwoofer (subwoofer)
   - Speakers with the size set to Off cannot be selected. (Refer to Setting the speaker setting on the previous page.)

4 Touch ◄ or ► to adjust the speaker output level.
   Range: +10 to −10

Note
You will get the same results whether you adjust the speaker output levels with this mode or with Test Tone.

Selecting a cross-over frequency
The frequency under which sounds are reproduced through a subwoofer can be selected. For example, if the size of one of the installed speakers is set to Small, you can select the frequency under which sounds will be reproduced through a speaker set to Large or a subwoofer.

1 Display the DSP function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Cross Over.

3 Touch ▲ or ▼ to select the speaker to be adjusted.
   Front—Center—Rear—Subwoofer
   Rear-R (right rear speaker)—Rear-L (left rear speaker)—Subwoofer (subwoofer)

4 Touch ◄ or ► to select the cross-over frequency.
   63Hz—80Hz—100Hz—125Hz—160Hz—200Hz
When you select a cross-over frequency, you are setting the cross-over frequency for the subwoofer’s L.P.F. (low-pass filter) and the Small speaker’s H.P.F. (high-pass filter). The cross-over frequency setting has no effect if the subwoofer is set to Off and other speakers are set to Large or Off.

**Adjusting the speaker output levels using a test tone**

You can easily get the right overall balance among the speakers with this function.

1. Display the DSP function menu. Refer to *Introduction of menu operations* on page 46.
2. Touch Test Tone.
3. Touch Start to start test tone output. The test tone is emitted from each speaker in the following sequence at intervals of about two seconds. The current settings for the speaker emitting the test tone will be shown on the display.
   - Front-L (left front speaker) — Center (center speaker) — Front-R (right front speaker) — Rear-R (right rear speaker) — Rear-L (left rear speaker) — Subwoofer (subwoofer)
   - Check each speaker output level. If no adjustments are needed, perform step 5 to stop the test tone.
     - The settings for speakers with the size set to Off will not be displayed. (Refer to *Setting the speaker setting* on page 53.)
4. Touch ▼ or ► to adjust the speaker output level. Range: +10 to –10
   - The test tone will be emitted from the next speaker after about two seconds after the last operation.
5. Touch Stop to end test tone output.

**Notes**

- If necessary, select speakers and adjust their ‘absolute’ output levels. (Refer to *Adjusting the speaker output levels* on the previous page.)
- You will get the same results whether you adjust the speaker output levels with this mode or with Speaker Level.

**Using time alignment**

The distance between the listening position and each speaker can be adjusted with this function.

1. Display the DSP function menu. Refer to *Introduction of menu operations* on page 46.
2. Touch Time Alignment.
3. Touch any of the following touch panel keys to select the time alignment.
   - Initial – Initial time alignment (factory setting)
   - Auto TA – Time alignment created by auto TA and EQ. (Refer to *Auto TA and EQ (auto-time alignment and auto-equalizing)* on page 57.)
   - Custom – Adjusted time alignment that you can create
   - Adjustment – Enables adjusting the time alignment as desired
   - Off – Turns Time Alignment off
   - You cannot select Auto TA if auto TA and EQ have not been carried out.
   - Adjustment can only be selected when either Front-L or Front-R is selected in Position.

**Adjusting time alignment**

The distance between the selected position and each speaker can be adjusted.
- The adjusted time alignment is stored in Custom.
1 Display the DSP function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Time Alignment and then touch Adjustment.
- Adjustment can only be selected when either Front-L or Front-R is selected in Position.

3 Touch ▲ or ▼ to select the speaker to be adjusted.
Front-L (left front speaker)—Center (center speaker)—Front-R (right front speaker)—
Rear-R (right rear speaker)—Rear-L (left rear speaker)—Subwoofer (subwoofer)
- Speakers with the size set to Off cannot be selected. (Refer to Setting the speaker setting on page 53.)

4 Touch ◀ or ▶ to adjust the distance between the selected speaker and the listening position.
Range: 0.0cm to 500.0cm

Using the equalizer
You can adjust the equalization to match the car’s interior acoustic characteristics as desired.

Recalling equalizer curves
There are seven stored equalizer curves which you can easily recall at any time. Here is a list of the equalizer curves.

<table>
<thead>
<tr>
<th>Display</th>
<th>Equalizer curve</th>
</tr>
</thead>
<tbody>
<tr>
<td>Powerful</td>
<td>Powerful</td>
</tr>
<tr>
<td>Natural</td>
<td>Natural</td>
</tr>
<tr>
<td>Vocal</td>
<td>Vocal</td>
</tr>
<tr>
<td>Flat</td>
<td>Flat</td>
</tr>
<tr>
<td>Custom1</td>
<td>Custom 1</td>
</tr>
<tr>
<td>Custom2</td>
<td>Custom 2</td>
</tr>
<tr>
<td>Super Bass</td>
<td>Super bass</td>
</tr>
</tbody>
</table>

- The equalizer curves for Custom1 and Custom2 can be adjusted.
- When Flat, no changes are made to the sound. You can check the effects of the equalizer curves by switching alternatively between Flat and another equalizer curve.
- When Digital Direct is on, the equalizer curve is fixed to Flat.

1 Display the DSP function menu.
Refer to Introduction of menu operations on page 46.

2 Touch Parametric EQ.

3 Touch ▲ or ▼ to select the EQ (equalizer).

4 Touch ◀ to select the equalizer.
Powerful—Natural—Vocal—Flat—Custom1—Custom2—Super Bass

Adjusting the 3-band parametric equalizer
For Custom1 and Custom2 equalizer curves, you can adjust the front, rear and center equalizer curves separately by selecting a center frequency, an equalizer level and a Q factor for each band.
- A separate Custom1 curve can be created for each source.
- A Custom2 curve that is common for all sources can be created.
- The center speaker largely determines the sound image and getting the balance right is not easy. We recommend that you first adjust the balance among all of the speakers except the center speaker, by playing 2-channel audio (a CD, for example). Then, play 5.1-channel audio (Dolby Digital or DTS) and adjust the center speaker output to match the balance already created among the other speakers.

1 Display the DSP function menu.
Refer to Introduction of menu operations on page 46.
2 Touch Parametric EQ.

3 Touch ▲ or ▼ to select the desired item.
   EQ (equalizer) — SP-Select (speakers) — Band (bands) — Frequency (center frequency) — Level (equalizer level) — Q. Factor (Q factor)

4 Touch ► to select the equalizer.
   Powerful — Natural — Vocal — Flat — Custom1 — Custom2 — Super Bass

5 Touch ▼ and then touch ◀ or ► to select the speaker to be adjusted.
   Rear (rear speakers) — Center (center speaker) — Front (front speakers)
   ▪ Speakers with the size set to Off cannot be selected. (Refer to Setting the speaker settings on page 53.)

6 Touch ▼ and then touch ◀ or ► to select the equalizer band to be adjusted.
   Low (low) — Mid (mid) — High (high)

7 Touch ▼ and then touch ◀ or ► to select the center frequency of selected band.
   40Hz — 50Hz — 63Hz — 80Hz — 100Hz — 125Hz — 160Hz — 200Hz — 250Hz — 315Hz — 400Hz — 500Hz — 630Hz — 800Hz — 1kHz — 1.25kHz — 1.6kHz — 2kHz — 2.5kHz — 3.15kHz — 4kHz — 5kHz — 6.3kHz — 8kHz — 10kHz — 12.5kHz

8 Touch ▼ and then touch ◀ or ► to adjust the equalizer level.
   Range: +12 to −12

9 Touch ▼ and then touch ◀ or ► to select the desired Q factor.
   Narrow (narrow) — Wide (wide)
   ▪ Adjust the parameters of each band for the other speakers in the same way.

Note
   A center frequency can be selected for each band and can be changed in 1/3-octave steps. However, the interval between the selected center frequencies cannot be shorter than 1 octave.

Using the auto-equalizer
   The auto-equalizer is the equalizer curve created by auto TA and EQ (refer to Auto TA and EQ (auto-time alignment and auto-equalizing) on this page) on this page. You can turn the auto-equalizer on or off.

1 Display the DSP function menu.
   Refer to Introduction of menu operations on page 46.

2 Touch Auto EQ.
   ▪ You cannot use this function if auto TA and EQ have not been carried out.

3 Touch ► to turn the auto-equalizer on.
   ▪ To turn the auto-equalizer off, touch ◀.

Auto TA and EQ (auto-time alignment and auto-equalizing)
   Auto-time alignment automatically adjusts the time alignment according to the distance between the listening position and each speaker. The auto-equalizer automatically measures the car’s interior acoustic characteristics, and then creates an auto-equalizer curve based on that information.

⚠️ WARNING
   As a loud tone (noise) may be emitted from the speakers when measuring the car’s interior acoustic characteristics, never perform auto TA or auto EQ while driving.

⚠️ CAUTION
   • Thoroughly check the conditions before performing auto TA and EQ as the speakers may be damaged if these functions are performed when:
     — The speakers are incorrectly connected. (For example, when a rear speaker is connected as a subwoofer output.)
     — A speaker is connected to a power amp delivering output higher than the speaker’s maximum input power capability.
If the microphone is placed in an unsuitable position the measurement tone may become loud and measurement may take a long time, resulting in battery drainage. Be sure to place the microphone in the specified location.

Before operating the auto TA and EQ function

- Perform auto TA and EQ in a quiet place, with both the car engine and air conditioning switched off. Also turn off any car phones or portable telephones in the car, or remove them from the car. Sounds other than the measurement tone (such as surrounding sounds, engine sound, telephones ringing) may prevent correct measurement of the car’s interior acoustic characteristics.
- Be sure to perform auto TA and EQ using the optional microphone. Using another microphone may prevent measurement, or result in incorrect measurement of the car’s interior acoustic characteristics.
- In order to perform auto TA and EQ, the front speaker must be connected.
- When this unit is connected to a power amp with input level control, auto TA and EQ may not be possible if the power amp’s input level is set below the standard level.
- When this unit is connected to a power amp with an LPF, turn this LPF off before performing auto TA and EQ. Also set the cut-off frequency for the built-in LPF of an active subwoofer to the highest frequency.
- The time alignment value resulting from auto TA and EQ has been calculated by a computer and is the optimum delay time that will give accurate results. Be sure to use the resulting value although it may differ from the actual distance when:
  — The reflected sound within the car is strong and delays occur.
  — The LPF on active subwoofers or external amps delay the lower sounds.
- Auto TA and EQ changes the audio settings as follows:
  — The fader/balance settings return to the center position. (Refer to page 50.)
  — The equalizer curve switches to Flat. (Refer to Recalling equalizer curves on page 47.)
  — The front, center and rear speakers will automatically be adjusted to a high pass filter setting.
- Previous settings for auto TA and EQ will be overwritten.

Performing auto TA and EQ

For details concerning operation, refer to the operation manual for the multi-channel processor.

1 Stop the car in a place that is quiet, close all the doors, windows and sun roof, and then turn the engine off.
   If the engine is left running, engine noise may prevent correct auto EQ.

2 Fix the optional microphone in the center of the headrest of the driver’s seat, facing forward. The auto EQ may differ depending on where you place the microphone. If desired, place the microphone on the front passenger seat to carry out auto EQ.

3 Turn the ignition switch to ON or ACC. If the car’s air conditioner or heater is turned on, turn it off. Noise from the fan in the air conditioner or heater may prevent correct auto EQ.
   - If this unit is turned off, press SRC/OFF to turn the source on.
4 Select the position for the seat on which the microphone is placed.
   Refer to Using the position selector on page 50.
   - If no position is selected before you start auto EQ, Front-L is selected automatically.

5 Turn the unit off.
   Refer to Basic operations on page 12.

6 Display the system menu.
   Refer to Introduction of menu operations on page 46.

7 Touch Auto EQ & TA Measurement to enter auto EQ and TA measurement mode.

8 Plug the microphone into the microphone input jack.

9 Touch Start to start auto EQ.

10 When the 10-second countdown starts, get out of the car and close the door within 10 seconds.
   A measurement tone (noise) is emitted from the speakers, and auto EQ measurement begins.
   When auto EQ is completed, Complete is displayed.
   When the car’s interior acoustic characteristics cannot be measured correctly, an error message will be displayed. (Refer to Understanding auto EQ/auto TA and EQ error messages on page 97.)

   - It takes about nine minutes for auto EQ measurement to be completed when all the speakers are connected.
   - To stop auto EQ, touch Stop.
   - To cancel auto EQ measurement mode during this procedure, touch the following touch panel key.

11 Store the microphone carefully in the glove compartment or another safe place.
   If the microphone is subjected to direct sunlight for an extended period, high temperatures may cause distortion, color change or malfunction.
Setting up the DVD player

Setting the subtitle language

You can set a desired subtitle language. When available, the subtitles will be displayed in the selected language.

1 Stop playback.
Refer to Introduction of video playback operations on page 17.

2 Display the Video Setup menu.
Refer to Introduction of menu operations on page 46.

3 Touch Subtitle Language on the Video Setup menu.
A subtitle language menu is displayed.

4 Touch the desired language.
The subtitle language is set.
   - If you have selected Others, refer to When you select Others on this page.

Notes
- If the selected language is not available, the language specified on the disc is displayed.
- You can also switch the subtitle language by touching the icon during playback. (Refer to Playing moving images on page 17.)
- The setting made here will not be affected even if the subtitle language is switched during playback using Subtitle.

When you select Others
A language code input display is shown when Others is selected. Refer to Language code chart for DVD on page 107.

1 Touch 0 to 9 to input the language code.
   - To cancel the entered numbers, touch C.

2 Registering the code.

Setting the audio language

You can set the preferred audio language.

1 Display the Video Setup Menu.
Refer to Introduction of menu operations on page 46.

2 Touch Audio Language on the Video Setup menu.
An audio language menu is displayed.

3 Touch the desired language.
The audio language is set.
   - If you have selected Others, refer to When you select Others on this page.

Notes
- If the selected language is not available, the language specified on the disc is used.
- You can also switch the audio language by touching Audio during playback. (Refer to Playing moving images on page 17.)
- The setting made here will not be affected even if the audio language is switched during playback using Audio.

Setting the menu language

You can set the preferred language in which the menus recorded on a disc are displayed.

1 Display the Video Setup Menu.
Refer to Introduction of menu operations on page 46.

2 Touch Menu Language on the Video Setup menu.
A menu language menu is displayed.

3 Touch the desired language.
The menu language is set.
   - If you have selected Others, refer to When you select Others on this page.

Note
If the selected language is not available, the language specified on the disc is displayed.
Setting the multi-angle DVD display
The angle icon can be set so it appears on scenes where the angle can be switched.

1 Display the Video Setup Menu. Refer to Introduction of menu operations on page 46.
2 Touch Multi Angle on the Video Setup menu to turn angle icon display on or off.

Setting the aspect ratio
There are two kinds of display: a wide screen display that has a width-to-height ratio (TV aspect ratio) of 16:9, and regular display that has a TV aspect of 4:3. Be sure to select the correct TV aspect for the display connected to V OUT.
• When using regular display, select either Letter Box or Pan Scan. Selecting 16:9 may result in an unnatural picture.
• If you select the TV aspect ratio, the unit’s display will change to the same setting.

1 Display the Video Setup Menu. Refer to Introduction of menu operations on page 46.
2 Touch TV Aspect on the Video Setup menu to select the TV aspect ratio. Touch TV Aspect repeatedly until the desired aspect ratio appears.
• 16:9 – Wide screen picture (16:9) is displayed as is (initial setting)
• Letter Box – The picture is the shape of a letterbox with black bands on the top and bottom of the screen
• Pan Scan – The picture is cut short on the right and left sides of the screen

Notes
• When playing discs that do not specify Pan Scan, the disc is played back in Letter Box display even if you select the Pan Scan setting. Confirm whether the disc package bears the 16:9 mark.
• The TV aspect ratio cannot be changed for some discs. For details, refer to the disc’s instructions.

Setting the slide show interval
JPEG files can be viewed as a slide show on this unit. In this setting, the interval between each image can be set.

1 Display the Video Setup Menu. Refer to Introduction of menu operations on page 46.
2 Touch Time Per Photo Slide on the Video Setup menu to select the slide show interval. Touch Time Per Photo Slide repeatedly until the desired setting appears.
• 5sec – JPEG images switch at intervals of 5 seconds
• 10sec – JPEG images switch at intervals of 10 seconds
• 15sec – JPEG images switch at intervals of 15 seconds
• Manual – JPEG images can be switched manually

Setting parental lock
Some DVD video discs let you use parental lock to restrict children from viewing violent and adult-oriented scenes. You can set parental lock to the desired level.
• When you have a parental lock level set and play a disc featuring parental lock, code number input indications may be displayed. In such cases, playback will begin when the correct code number is entered.

Setting the code number and level
A code number must be registered in order to play back discs with parental lock.

1 Display the Video Setup Menu. Refer to Introduction of menu operations on page 46.
2 Touch Parental on the Video Setup menu.
3 Touch 0 to 9 to input a four digit code number.
4 To cancel the entered numbers, touch C.
4 Registering the code.

The code number is set, and the level can now be set.

5 Touch 1 to 8 to select the desired level.

6 Touch Enter.
The parental lock level is set.

- **8** – Playback of the entire disc is possible (initial setting)
- **7 to 2** – Playback of discs for children and non-adult-oriented discs is possible
- **1** – Playback of discs for children only is possible

**Notes**
- We recommend to keep a record of your code number in case you forget it.
- The parental lock level is stored on the disc. Look for the level indication written on the disc package, included literature or on the disc itself. Parental lock of this unit is not possible if a parental lock level is not stored on the disc.
- With some discs, the parental lock may be active only for certain levels of scenes. The playback of those scenes will be skipped. For details, refer to the instruction manual that came with the disc.

### Changing the level

You can change the set parental lock level.

1 **Display the Video Setup Menu.**
Refer to *Introduction of menu operations* on page 46.

2 **Touch Parental on the Video Setup menu.**

3 **Touch 0 to 9 to input the registered code number.**

4 Registering the code.

This sets the code number, and the level can now be changed.

- If you enter an incorrect code number, the icon is displayed. Touch **C** and enter the correct code number.
- If you forget your code number, refer to *If you forget your code number* on this page.

5 **Touch 1 to 8 to select the desired level.**

6 **Touch Enter.**
The new parental lock level is set.

**If you forget your code number**

Press **RESET**.

### Setting the DivX subtitle file

You can select whether or not to display DivX external subtitles.

- The DivX subtitles will be displayed even when **Custom** is selected if no DivX external subtitle files exist.

1 **Display the Video Setup Menu.**
Refer to *Introduction of menu operations* on page 46.

2 **Touch DivX Subtitle on the Video Setup menu to select the desired subtitle setting.**

- **Original** – Display the DivX subtitles
- **Custom** – Display the DivX external subtitles

**Notes**
- Up to 42 characters can be displayed on one line. If more than 42 characters are set, the line breaks and the characters are displayed on the next line.
- Up to 126 characters can be displayed on one screen. If more than 126 characters are set, the excess characters will not be displayed.
Displaying the DivX® VOD registration code
In order to play DivX VOD (video on demand) contents on this unit, the unit must first be registered with a DivX VOD contents provider. For registration, generate a DivX VOD registration code and submit it to your provider.
- Keep a record of the code as you will need it when you register your unit to the DivX VOD provider.

1. Display the Video Setup Menu. Refer to Introduction of menu operations on page 46.
3. Touch Registration Code. Your registration code is displayed.

Displaying the deregistration code
If your device is already activated, deregister it by entering the deregistration code.

1. Display the Video Setup Menu. Refer to Introduction of menu operations on page 46.
2. Touch DivX VOD on the Video Setup menu.
3. Touch Deregistration (Deactivation) Code.
   - To cancel deregistration, touch Cancel.
4. Touch OK. The deregistration is complete.

Setting for digital output
Audio which is outputted from digital output of this unit can be selected. Normally, set to Stream. If this unit’s digital output is not used, there is no need to change settings.

1. Display the Video Setup Menu. Refer to Introduction of menu operations on page 46.
2. Touch Digital Output on the Video setup menu to select the desired digital output setting.
   - Stream – The Dolby Digital/DTS signal is output as it is (initial setting)
   - Linear PCM – The Dolby Digital/DTS signal is converted to and output as a linear PCM signal

Automatic playback of DVDs
When a DVD disc with a DVD menu is inserted, this unit will cancel the menu automatically and start playback from the first chapter of the first title.
- Some DVDs may not operate properly. If this function is not fully operated, turn this function off and start playback.

1. Display the Video Setup Menu. Refer to Introduction of menu operations on page 46.
2. Touch DVD Auto Play to turn automatic playback on.
   - To turn automatic playback off, touch DVD Auto Play again. ✗
System settings

Switching the auxiliary setting
Activate this setting when using an auxiliary device connected to this unit.

1 Display the system menu.
Refer to Introduction of menu operations on page 46.

2 Touch AUX Input on the system menu to turn AUX Input on or off.

Setting AV input
Activate this setting when using an external video component connected to this unit.

1 Display the system menu.
Refer to Introduction of menu operations on page 46.

2 Touch AV Input on the system menu to turn AV Input on or off.

Setting the rear output and subwoofer controller
This unit’s rear output (rear speaker leads output and RCA rear output) can be used for full-range speaker (Full) or subwoofer (Subwoofer) connection. If you switch the rear output setting to Subwoofer, you can connect a rear speaker lead directly to a subwoofer without using an auxiliary amp.
Initially, the unit is set for a rear full-range speaker connection (Full).
- When the DEQ-P7650/DEQ-P6600 multi-channel processor is connected to this unit, you cannot operate this function.

1 Turn the unit off.
Refer to Basic operations on page 12.

2 Display the system menu.
Refer to Introduction of menu operations on page 46.

3 Touch Rear Speaker on the system menu to switch the subwoofer output or full-range speaker.
- When no subwoofer is connected to the rear output, select Full (full-range speaker).
- When a subwoofer is connected to the rear output, select Subwoofer (subwoofer).

Notes
- Even if you change this setting, there will be no output unless you turn the subwoofer output on (refer to Using subwoofer output on page 48).
- If you change this setting, subwoofer output in the audio menu will return to the factory settings.
- Both rear speaker lead outputs and RCA rear output are switched simultaneously in this setting.

Setting the FM tuning step
- The tuning step remains at 50 kHz during manual tuning.

1 Turn the unit off.
Refer to Basic operations on page 12.

2 Display the system menu.
Refer to Introduction of menu operations on page 46.

3 Touch FM Step on the system menu to select the FM tuning step.
Touching FM Step will switch the FM tuning step between 50 kHz and 100 kHz. The selected FM tuning step will appear.

Setting the AM tuning step
- Touch AM Step on the initial menu to select the AM tuning step.
Touching AM Step will switch the AM tuning step between 9 kHz and 10 kHz. The selected AM tuning step will appear in the display.
Switching sound muting/attenuation

Sound from this system is automatically muted or attenuated when a signal from equipment with a mute function is received.

- Sound from this system returns to normal when the muting or attenuation is canceled.

1 Display the system menu.
   Refer to Introduction of menu operations on page 46.

2 Touch Mute/ATT until the desired setting appears.
   Touch Mute/ATT until the desired setting appears in the display.
   - Mute – Muting
   - ATT –20dB – Attenuation (ATT –20dB has a stronger effect than ATT –10dB)
   - ATT –10dB – Attenuation
   - Off – Turns the sound muting/attenuation off

Notes

- When Mute is displayed, the sound is turned off and no audio adjustments can be made.
- When ATT is displayed, the sound is attenuated and only the volume can be adjusted.
  (No other audio adjustments can be made.)
- Operation returns to normal when the phone connection is ended.

Selecting the menu language

The menu language can be selected from four languages.

If text information such as the title name, artist name or a comment is embedded in a European language or Russian, they can also be displayed on this unit.

- The language can be changed for the following:
  - System menu
  - Video Setup Menu
  - On-screen display
  - Multi language setting for DivX

- If the embedded language and the selected language setting are not the same, text information may not display properly.
- Some characters may not be displayed properly.
- To complete this operation, switch the ignition key off and on after you set this setting.

1 Display the system menu.
   Refer to Introduction of menu operations on page 46.

2 Touch System Language on the system menu to select the desired language.

3 Touch the desired language.
   - English (English)—ไทย (Thai)—Español (Spanish)—Português (Portuguese) for South American and Oceanian models
   - English (English)—Русский (Russian)—العربية (Arabic)—فارسی (Persian) for Middle East Asian and South African models

Clearing Bluetooth memory

(AVH-P3350BT only)

- Important
   Never turn the unit off while the Bluetooth memory is being cleared.

1 Turn the unit off.
   Refer to Basic operations on page 12.

2 Display the system menu.
   Refer to Introduction of menu operations on page 46.

3 Touch Bluetooth Memory Clear on the system menu.

4 Touch Clear.
   After selecting a desired item, a confirmation display appears. Touch OK to delete the memory.
   - If you do not want to clear the selected memory, touch Cancel.
Updating Bluetooth connection software
(AVH-P3350BT only)
This function is used to update this unit with the latest software. For information on the software and updating, refer to our website.

Important
Never turn the unit off and never disconnect the phone while the software is being updated.

1 Turn the unit off.
Refer to Basic operations on page 12.

2 Display the system menu.
Refer to Introduction of menu operations on page 46.

3 Touch Bluetooth Software Update.

4 Touch Start to display the data transfer mode.
   ▪ Follow the on-screen instructions to finish updating the software.

Displaying the Bluetooth system version
(AVH-P3350BT only)
If this unit fails to operate properly, you may need to consult your dealer for repair. In such cases, you may be asked to specify the system version. Perform the following procedure to check the version on this unit.

1 Turn the unit off.
Refer to Basic operations on page 12.

2 Display the system menu.
Refer to Introduction of menu operations on page 46.

3 Touch Bluetooth Version Information to display the version of the Bluetooth module of this unit.

Setting the rear view camera (back up camera)

CAUTION
Pioneer recommends the use of a camera which outputs mirror-reversed images. Otherwise, the screen image will appear reversed.

This unit features a function that automatically switches to the rear view camera video (R.C IN) when a rear view camera is installed on your car and the gear shift is moved to the REVERSE (R) position. (For more details, consult your dealer.)

• After you set up the rear view camera setting, move the gear shift to REVERSE (R) and confirm that the rear view camera video is shown on the display.
• Change this setting if the display switches to the rear view camera video by error while you are driving forward.
• To stop watching the rear view camera video and return to the source display, press and hold MUTE.
• Touch the RearView source icon to display the rear view camera image while driving. Touch the source icon again to turn the rear view camera off. For details, refer to Selecting a source using the touch panel keys on page 12.

1 Display the system menu.
Refer to Introduction of menu operations on page 46.

2 Touch Camera Polarity on the system menu to select the appropriate setting.
   • Battery – When the polarity of the connected lead is positive while the gear shift is in REVERSE (R) position
   • Ground – When the polarity of the connected lead is negative while the gear shift is in REVERSE (R) position
   • Off – When a rear view camera is not connected to this unit
Menu operations

Selecting the video format
You can switch the video output format of V OUT between NTSC and PAL.

1  Display the system menu.
Refer to Introduction of menu operations on page 46.

2  Touch Video Output Format on the system menu to select the video output format.
NTSC—PAL

Note
You can switch the video output format only for the source from this unit.

Setting the video signal
When you connect this unit to an AV equipment to this unit, select the suitable video signal setting.
•  As this function is initially set to Auto, the unit will automatically adjust the video signal setting.
  However, the screen may turn black or images may not be displayed properly when Auto has been selected and the reception is weak. Normally, select the appropriate TV signal.
•  About your country TV signal, consult with your nearest Pioneer dealer.
•  You can operate this function only for the video signal input into the AV input.

1  Display the system menu.
Refer to Introduction of menu operations on page 46.

2  Touch Video Signal Setting on the function menu.
Video Signal Setting items are displayed.
•  AV – Adjusts the AV video signal
•  AUX – Adjusts the AUX video signal
•  Camera – Adjusts the camera video signal
•  TV – Adjusts the TV video signal

3  Touch ◀ or ▶ to select the desired video signal appears.
Auto—PAL—NTSC—PAL-M—PAL-N—SECAM

Selecting the area group
1  Select the TV source.
Refer to Basic operations on page 12.

2  Display the system menu.
Refer to Introduction of menu operations on page 46.

3  Touch TV Country Group on the function menu.

4  Touch ◀ or ▶ until the desired area group appears.
Country1 (CCIR channel)—Country2 (IN channel)—Country3 (CHN channel)—
Country4 (U.K. channel)—Country5 (OIRT channel)—Country6 (AUSTRALIA channel)—
Country7 (SAF channel)

Auto EQ (auto-equalizing)
The auto-equalizer automatically measures the car’s interior acoustic characteristics, and then creates an auto-equalizer curve based on that information.

⚠️ WARNING
As a loud tone (noise) may be emitted from the speakers when measuring the car’s interior acoustic characteristics, never perform auto TA or auto EQ while driving.

⚠️ CAUTION
•  Thoroughly check the conditions before performing auto EQ as the speakers may be damaged if these functions are performed when:
  — The speakers are incorrectly connected.
  (For example, when a rear speaker is connected as a subwoofer output.)
— A speaker is connected to a power amp delivering output higher than the speaker’s maximum input power capability.

- If the microphone is placed in an unsuitable position the measurement tone may become loud and measurement may take a long time, resulting in battery drainage. Be sure to place the microphone in the specified location.

Before operating the auto EQ function

- Carry out auto EQ in as quiet a place as possible, with the car engine and air conditioning switched off. Also cut power to car phones or portable telephones in the car, or remove them from the car before carrying out auto EQ. Sounds other than the measurement tone (surrounding sounds, engine sound, telephones ringing etc.) may prevent correct measurement of the car interior acoustic characteristics.

- Be sure to carry out auto EQ using the optional microphone. Using another microphone may prevent measurement, or result in incorrect measurement of the car interior acoustic characteristics.

- In order to perform auto EQ, the front speaker must be connected.

- When this unit is connected to a power amp with input level control, auto EQ may not be possible if the power amp’s input level is set below the standard level.

- When this unit is connected to a power amp with an LPF, turn this LPF off before performing auto EQ. Also set the cut-off frequency for the built-in LPF of an active subwoofer to the highest frequency.

- The distance has been calculated by computer to be the optimum delay to give accurate results for the circumstances, so please continue to use this value.
  - The reflected sound within the car is strong and delays occur.
  - The LPF on active subwoofers or external amps delay the lower sounds.

- Auto EQ changes the audio settings as follows:

  - The fader/balance settings return to the center position. (Refer to Using fader/balance adjustment on page 47.)
  - The equalizer curve switches to Flat. (Refer to Recalling equalizer curves on page 47.)
  - The front, center and rear speakers will automatically be adjusted to a high pass filter setting.

- Previous settings for auto EQ will be overwritten.

Performing auto EQ

1 Stop the car in a place that is quiet, close all the doors, windows and sun roof, and then turn the engine off. If the engine is left running, engine noise may prevent correct auto EQ.

2 Fix the optional microphone in the center of the headrest of the driver’s seat, facing forward. The auto EQ may differ depending on where you place the microphone. If desired, place the microphone on the front passenger seat to carry out auto EQ.

3 Turn the ignition switch to ON or ACC. If the car’s air conditioner or heater is turned on, turn it off. Noise from the fan in the air conditioner or heater may prevent correct auto EQ.

4 Display the system menu. Refer to Introduction of menu operations on page 46.
5 Touch Auto EQ Measurement to enter auto EQ measurement mode.

6 Plug the microphone into the microphone input jack on this unit.

7 Touch Start to start auto EQ.

8 When the 10-second countdown starts, get out of the car and close the door within 10 seconds.
A measurement tone (noise) is emitted from the speakers, and auto EQ measurement begins.
When auto EQ is completed, Complete is displayed.
When the car’s interior acoustic characteristics cannot be measured correctly, an error message will be displayed. (Refer to Understanding auto EQ/auto TA and EQ error messages on page 97.)
- It takes about nine minutes for auto EQ measurement to be completed when all the speakers are connected.
- To stop auto EQ, touch Stop.
- To cancel auto EQ measurement mode during this procedure, touch the following touch panel key.

9 Store the microphone carefully in the glove compartment or another safe place.
If the microphone is subjected to direct sunlight for an extended period, high temperatures may cause distortion, color change or malfunction.

10 Press ▲(eject) to close the panel.
(AVH-P4350DVD only)

Note
(AVH-P4350DVD)
Do not press ▲ (eject) to open or close the panel when you are using the microphone.

Correcting distorted sound
When listening to a CD or other source on which the recording level is high, setting the level of each frequency to high may result in distortion. You can switch the digital attenuator to low to reduce distortion.
- Sound quality is better at the high setting so this setting is usually used.

1 Display the system menu.
Refer to Introduction of menu operations on page 46.

2 Touch Digital ATT.

3 Touch Digital ATT on the system menu to select the digital attenuator level.
High—Low

Resetting the audio functions
You can reset all audio functions.

1 Display the system menu.
Refer to Introduction of menu operations on page 46.

2 Touch Audio Reset.
3 Touch Reset.
Ready to reset. Are you sure? appears in the display.
- To cancel this function on the way, touch Cancel.

4 Touch Reset again.
The reset end was carried out. appears in the display and audio functions are reset.

Entertainment settings
Selecting the illumination color
This unit is equipped with multiple-color illumination.

Direct selection from preset illumination colors
You can select an illumination color from the color list.

1 Display the entertainment menu.
Refer to Introduction of menu operations on page 46.

2 Touch Appearance.

3 Touch Illumination and then touch a color on the list.

Customizing the illumination color
1 Display the entertainment menu.
Refer to Introduction of menu operations on page 46.

2 Touch Appearance.

3 Touch Illumination and then touch Custom.

4 Display the customizing menu.

5 Touch the color bar to customize the color.

6 Touch ◀ or ▶ to fine-tune the color.

7 Touch the icon and hold to store the customized color in the memory.

Memo
Storing the customized color in the memory.
The customized color has been stored in the memory. The set color will be recalled from the memory the next time you touch the same icon.

**Selecting the OSD color**
The OSD color can be changed.

1. **Display the entertainment menu.** Refer to *Introduction of menu operations* on page 46.
2. **Touch Appearance.**
3. **Touch Screen.**
4. **Touch one of the colors on the list.**

**Selecting the background display**
You can switch the background that is displayed when listening to a source.

1. **Display the entertainment menu.** Refer to *Introduction of menu operations* on page 46.
2. **Touch Background.**
3. **Touch the desired setting.**
   - If no JPEG images are stored in this unit, you cannot select photo. To store a JPEG image to this unit, refer to *Capture an image in JPEG files* on page 37.

**Customizing menus**
1. **Display menu columns to register.** Refer to *Introduction of menu operations* on page 46. You can customize menus except Video Setup.
2. **Touch and hold the menu column to register it.**
   - To cancel registration, touch and hold the menu column again.
3. **Display the custom menu and choose a registered menu.** Refer to *Introduction of menu operations* on page 46.

**Notes**
- You can register up to 12 columns.
- If you register a column from the Audio function menu, the registration will be cancelled when a DEQ-P7650/DEQ-P6600 multi-channel processor is connected.
- If you register a column from the DSP menu, the registration will be canceled when the DEQ-P7650/DEQ-P6600 multi-channel processor is disconnected.
Changing the picture adjustment

You can adjust the Brightness (brightness), Contrast (contrast), Color (color), Hue (hue), Dimmer (dimmer), Temperature (temperature), Black Level (black level) and RGB Dot ADJ (RGB dot clock adjustment) for each source and rear view camera.

- You cannot adjust Color, Hue, Contrast and Black Level for the audio source.

1. Press and hold MENU to display Picture Adjustment. The adjustment function names are displayed.

2. If you are adjusting the Picture Adjustment, select the unit.

   - **NAVI** Adjusting the Picture Adjustment for the Navigation unit.
   - **Rear View** Adjusting the Picture Adjustment for the rear view camera.
   - **Source** Adjusting the Picture Adjustment for the source.

3. Touch any of the following touch panel keys to select the function to be adjusted. Picture Adjustment items are displayed.
   - Brightness – Adjusts the black intensity
   - Contrast – Adjusts the contrast
   - Color – Adjusts the color saturation
   - Hue – Adjusts the tone of color (red or green is emphasized)
   - Dimmer – Adjusts the brightness of the display
   - Temperature – Adjusts the color temperature, resulting in a better white balance
   - Black Level – Emphasizes the dark portions of images making the difference between bright and dark more distinct
   - RGB Dot ADJ – Adjusts phase shifting by dot clock when a Navigation unit is connected

- You cannot adjust the picture adjustment for the rear view camera when Camera Polarity is set to Off. (Refer to Setting the rear view camera (back up camera) on page 66.)
- If the color system is set to PAL/PAL-M/SECAM, you cannot adjust Hue.
- With some rear view cameras, picture adjustment may not be possible.

4. Touch ▼ or ▲ to adjust the selected item.
   Each time you touch ▼ or ▲, the level of the selected item increases or decreases.
   - Dimmer can be adjusted from +1 to +48.
   - Temperature can be adjusted from +3 to –3.

5. Touch Black Level and RGB Dot ADJ to adjust.
   - Black Level can be set on or off.
   - RGB Dot ADJ can be set to 1 or 2.

Notes
- You cannot operate this function while driving.
- Different Brightness/Contrast/Dimmer settings can be set for when the illumination switch is on and when it is off.

### Setting rear monitor output

The output source for the rear monitor can be switched to the following:
- **Front** – The source on the front screen of this unit
- **Disc** – The video and sound from the DVD
- **AV** – The video and sound from AV input
- **AUX** – The source for AUX input
- **Off** – No source

Note
You cannot play DivX files on the rear and front monitors at the same time.
Adjusting the response positions of the touch panels (Touch Panel Calibration)

If you feel that the touch panel keys on the screen deviate from the actual positions that respond to your touch, adjust the response positions of the touch panel. There are two adjustment methods: 4-point adjustment, in which you touch four corners of the screen; and 16-point adjustment, in which you make fine-adjustments on the entire screen.

- Touch the screen gently for adjustment.
  Forcefully pressing the touch panel may damage the touch panel. Do not use a sharp pointed tool such as a ballpoint pen or mechanical pen. Doing so may damage the screen.
- If the touch panel cannot be adjusted properly, consult your local Pioneer dealer.

1 Turn the unit off.
Refer to Basic operations on page 12.

2 Press and hold MENU to display Picture Adjustment.

3 Press and hold MENU to start Touch Panel Calibration.
The 4-point touch panel adjustment screen appears.

4 Touch each of the arrows on the four corners of the screen.
  - To cancel the adjustment, press and hold MENU.

5 Press MENU to complete 4-point adjustment.
Data for the adjusted position is saved.
  - Do not turn off the engine while the data is being saved.

6 Press MENU to proceed to 16-point adjustment.
The 16-point touch panel adjustment screen appears.

7 Gently touch the center of the + mark displayed on the screen.
After you touch all the marks, the data for the adjusted position is saved.
  - Do not turn off the engine while the data is being saved.

8 Press and hold MENU to complete the adjustment.

Using an AUX source

A separately sold auxiliary device such as a VCR or portable device can be connected to this unit. When connected, the auxiliary device is automatically recognized as an AUX source and is assigned to AUX.

About AUX connection methods

You can connect auxiliary devices to this unit.

Mini pin plug cable (AUX)

When connecting an auxiliary device using a mini plug cable
iPods and portable audio/video players can be connected to this unit via mini plug cable.

- If an iPod with video capabilities is connected to this unit via 3.5 mm plug (4 pole) cable (such as the CD-V150M), you can enjoy the video contents of the connected iPod.
- A portable audio/video player can be connected by using a 3.5 mm plug (4 pole) with an RCA cable (sold separately). However, depending on the cable, a reverse connection between the red (right side audio) cable and yellow (video) cable may be required in order for the sound and video image to be reproduced correctly.
Insert the stereo mini plug into the AUX input jack on this unit. Refer to the installation manual. Refer to What’s what on page 10.

Using an external unit
An external unit refers to a Pioneer product, such as those which will be available in the future. Although incompatible as a source, the basic functions of up to two external units can be controlled with this unit. When two external units are connected, the external units are automatically allocated to external unit 1 or external unit 2. The basic operations of the external unit are explained below. The allocated functions will differ depending on the connected external unit. For details concerning these functions, refer to the owner’s manual for the external unit.

Basic operations
The functions allocated to the following operations will differ depending on the connected external unit. For details concerning these functions, refer to the owner’s manual for the connected external unit.

Connecting the units

**CAUTION**
- PIONEER does not recommend that you install or service your display unit yourself. Installing or servicing the product may expose you to risk of electric shock or other hazards. Refer all installation and servicing of your display unit to authorized Pioneer service personnel.
- Secure all wiring with cable clamps or electrical tape. Do not allow any bare wiring to remain exposed.
- Do not drill a hole into the engine compartment to connect the yellow cable of the display unit to the vehicle battery. Engine vibration may eventually cause the insulation to fail at the point where the wire passes from the passenger compartment into the engine compartment. Take extra care in securing the wire at this point.
- It is extremely dangerous to allow the microphone lead to become wound around the steering column or gearstick. Be sure to install the unit in such a way that it will not obstruct driving.
- Make sure that cables will not interfere with moving parts of the vehicle, such as the gearshift, parking brake or seat sliding mechanism.
- Do not shorten any cables. If you do, the protection circuit may fail to work properly.

**WARNING**
- Use speakers over 50 W (output value) and between 4 Ω to 8 Ω (impedance value). Do not use 1 Ω to 3 Ω speakers for this unit.
- The black cable is ground. When installing this unit or power amp (sold separately), make sure to connect the ground wire first. Ensure that the ground wire is properly connected to metal parts of the car’s body. The ground wire of the power amp and the one of this unit or any other device must be connected to the car separately with different screws. If the screw for the ground wire loosens or falls out, it could result in fire, generation of smoke or malfunction.

![Ground wire](image)

- **Important**
  - This unit cannot be installed in a vehicle without ACC (accessory) position on the ignition switch.
  - Use this unit with a 12-volt battery and negative grounding only. Failure to do so may result in a fire or malfunction.
  - To prevent a short-circuit, overheating or malfunction, be sure to follow the directions below.
    - Disconnect the negative terminal of the battery before installation.
    - Secure the wiring with cable clamps or adhesive tape. Wrap adhesive tape around wiring that comes into contact with metal parts to protect the wiring.
    - Place all cables away from moving parts, such as the gear shift and seat rails.
— Place all cables away from hot places, such as near the heater outlet.
— Do not connect the yellow cable to the battery by passing it through the hole to the engine compartment.
— Cover any disconnected cable connectors with insulating tape.
— Do not shorten any cables.
— Never cut the insulation of the power cable of this unit in order to share the power with other devices. The current capacity of the cable is limited.
— Use a fuse of the rating prescribed.
— Never wire the negative speaker cable directly to ground.
— Never band together negative cables of multiple speakers.

• When this unit is on, control signals are sent through the blue/white cable. Connect this cable to the system remote control of an external power amp or the vehicle's auto-antenna relay control terminal (max. 300 mA 12 V DC). If the vehicle is equipped with a glass antenna, connect it to the antenna booster power supply terminal.
• Never connect the blue/white cable to the power terminal of an external power amp. Also, never connect it to the power terminal of the auto antenna. Doing so may result in battery drain or a malfunction.
• IP-BUS connectors are color-coded. Be sure to connect connectors of the same color.
When connecting to separately sold power amp

- Connect with RCA cables (sold separately)
- Rear speaker
- Power amp (sold separately)
- Power amp (sold separately)
- Power amp (sold separately)
- System remote control
- Subwoofer
- To subwoofer output
- To front output
- To rear output
- To front output
- To rear output

Perform these connections when using the optional amplifier.

- Blue/white
  Connect to system control terminal of the power amp or auto-antenna relay control terminal. (max. 300 mA 12 V DC).

• When you connect the separately sold multi-channel processor (e.g., DEQ-P6600/DEQ-P7650) to this unit, do not connect anything to the speaker leads and system remote control (blue/white).
• When you connect the multi-channel processor to this unit, refer to multi-channel processor’s installation manual for the connection method.
Connecting the system (for AVH-P4350DVD model)

- IP-BUS input
- Wired remote input
- Hard-wired remote control adaptor can be connected (sold separately).
- 1.5 m USB cable (Supplied with this unit)
- Connect to separately sold USB device.
- Microphone for hands-free phoning (supplied with Bluetooth adapter)
- Bluetooth adapter (e.g., CD-BTB200) (sold separately)
- Black

Connecting the system (for AVH-P3350BT model)

- IP-BUS input
- Wired remote input
- Hard-wired remote control adaptor can be connected (sold separately).
- DVD changer (sold separately)
- IP-BUS cable (Supplied with Bluetooth adapter)
When connecting with optional CD-IU200V cable (AVH-P4350DVD only)

- Wired remote input
- Hard-wired remote control adaptor can be connected (sold separately).
- iPod with video capabilities (sold separately)
- Microphone for hands-free phoning (supplied with Bluetooth adapter)

- **Violet**
- **Green/black**
- **Violet/black**

**Subwoofer (4 Ω) × 2**
- **Green**
- **Violet**
- **Green/black**
- **Violet/black**

When using a subwoofer of 70 W (2 Ω), be sure to connect with Violet and Violet/black leads of this unit. Do not connect anything to Green and Green/black leads.

When using a subwoofer of 70 W (2 Ω), be sure to connect with Violet and Violet/black leads of this unit. Do not connect anything to Green and Green/black leads.

This product (AVH-P4350DVD only)

- **RGB input**
- **Antenna input**
- **Fuse (10 A)**
- **Fuse resistor**
- **AUX jack (3.5 ø) (AVH-P4350DVD only)**
  - Use a mini plug cable to connect with auxiliary device.
  - Microphone input (AVH-P3350BT only)

**Microphone input (AVH-P3350BT only)**

**AUX jack (3.5 ø) (AVH-P4350DVD only)**

**Fuse (10 A)**

**Fuse resistor**

**Microphone input (AVH-P3350BT only)**
**Connection method**

1. Clamp the lead.

2. Clamp firmly with needle-nosed pliers.

**Note:**
- The position of the parking brake switch depends on the vehicle model. For details, consult the vehicle Owner’s Manual or dealer.

**Consumption**

- **4 m**

**Microphone (AVH-P3350BT only)**

**Wired remote input**

Hard-wired remote control adaptor can be connected (sold separately).

**Fuse resistor**

**Violet/white**

Of the two lead wires connected to the back lamp, connect the one in which the voltage changes when the gear shift is in the REVERSE (R) position. This connection enables the unit to sense whether the car is moving forwards or backwards.

**Yellow/black**

If you use an equipment with Mute function, wire this lead to the Audio Mute lead on that equipment. If not, keep the Audio Mute lead free of any connections.

**Light green**

Used to detect the ON/OFF status of the parking brake. This lead must be connected to the power supply side of the parking brake switch.

**Blue/white**

Connect to system control terminal of the power amp or auto-antenna relay control terminal (max. 300 mA 12 V DC).

With a 2 speaker system, do not connect anything to the speaker leads that are not connected to speakers.

When you connect the separately sold multi-channel processor (e.g., DEQ-P6600/DEQ-P7650) to this unit, do not connect anything to the speaker leads and system remote control (blue/white).

**Note:**
- Change the initial setting of this unit. The subwoofer output of this unit is monaural.
When connecting the external video component and the display

- It is necessary to change AV Input in System Menu when connecting the external video component.

When using a display connected to rear video output

This product’s rear video output and rear audio output are for connection of a display to enable passengers in the rear seats to watch the DVD, etc.

⚠️ WARNING
- Never install the display in a location where it is visible to the driver while driving.
When connecting with a rear view camera

When this product is used with a rear view camera, it is possible to automatically switch from the video to rear view image when the gear shift is moved to REVERSE (R).

**WARNING**

USE INPUT ONLY FOR REVERSE OR MIRROR IMAGE REAR VIEW CAMERA. OTHER USE MAY RESULT IN INJURY OR DAMAGE.

**CAUTION**

- The screen image may appear reversed.
- The rear view camera function is to be used as an aid to keep an eye on trailers, or while backing up. Do not use for entertainment purposes.
- Objects in the rear view may appear closer or more distant than they actually are.

**CAUTION**

You must use a camera which outputs mirror reversed images.

It is necessary to set Camera Polarity properly in System Menu when connecting the rear view camera.
Connecting and installing the optical cable connection box

**WARNING**
- Avoid installing the optical cable connection box in locations where the operation of safety devices such as airbags is prevented by this unit. Otherwise, there is a danger of a fatal accident.
- Avoid installing the optical cable connection box in locations where the operation of the brake may be prevented. Otherwise, it may result in a traffic accident.
- Fix the optical cable connection box securely with the hook and loop fastener or lock tie. If the unit is loose, it disturbs driving stability, which may result in a traffic accident.

**CAUTION**
- Install this unit using only the parts supplied with this unit. If other parts are used, this unit may be damaged or could dismount itself, which leads to an accident or other problems.
- Do not install this unit near the doors where rainwater is likely to be spilled on the unit. Incursion of water into the unit may cause smoke or fire.

Connecting the optical cable

1. **Connect the optical cable and ground lead to the main unit.**
   Connect the optical cable so that it does not protrude from the main unit, as shown in the illustration. Fasten the ground lead to the protrusion on the back of the main unit.

2. **Connect the optical cable to the optical cable connection box.**

Installing the optical cable connection box

- **When installing the optical cable connection box with the hook and loop fastener.**
  Install the optical cable connection box using the hook and loop fastener in the ample space of the console box.

- **When installing the optical cable connection box with the lock tie.**
  Wrap the optical cable and connection box with the protection tape and fasten with the power code using the lock tie.
Installation

1. Wrap with the protection tape
2. Fasten with the lock tie
Installation

Notes
- Check all connections and systems before final installation.
- Do not use unauthorized parts as this may cause malfunctions.
- Consult your dealer if installation requires drilling of holes or other modifications to the vehicle.
- Do not install this unit where:
  - it may interfere with operation of the vehicle.
  - it may cause injury to a passenger as a result of a sudden stop.
- Do not install the display where it may obstruct the driver’s vision, impair the performance of any of the vehicle’s operating systems or safety features, including air bags, hazard lamp buttons or impair the driver’s ability to safely operate the vehicle.
- The semiconductor laser will be damaged if it overheats. Install this unit away from hot places such as near the heater outlet.
- Optimum performance is obtained when the unit is installed at an angle of less than 30°.
- To ensure proper heat dispersal when using this unit, make sure you leave ample space behind the rear panel and wrap any loose cables so they are not blocking the vents when installing the unit.
- To some types of vehicles, this unit cannot be properly installed. In such case, use the optional installation kit (ADT-VA133) for South American and Oceanian models.

Before installing this unit
for Middle East Asian and South African models

- Remove the holder.
  Loosen the screws (3 mm × 6 mm) to remove the holder.

Installation with the holder and side bracket
for Middle East Asian and South African models

1 Install the holder into the dashboard.
After inserting the holder into the dashboard, select and bend the tabs appropriate to the thickness of the dashboard material. (Install this unit as firmly as possible using the top and bottom tabs. To secure this unit, bend the tabs 90 degrees.)
Installation

2 Install this unit and fasten the screws.

Dashboard
Screw (3 mm × 6 mm)
(Supplied with this unit)

3 Attach the trim ring.

Trim ring
(Supplied with this unit)

Installation using the screw holes on the side of the unit

1 Remove the side brackets.

Side bracket
(Supplied with this unit)
Screw for fixing the side bracket
(5 mm × 9 mm)
(Supplied with this unit)

- for Middle East Asian and South African models

2 Fastening the unit to the factory radio-mounting bracket.
Position the unit so that its screw holes are aligned with the screw holes of the bracket, and tighten the screws at 3 or 4 locations on each side.
If the pawl gets in the way, bend it down.

Factory radio mounting bracket

Use either truss (5 mm × 8 mm) or flush surface (5 mm × 9 mm) screws, depending on the bracket screw holes.

Frame
In some types of vehicles, discrepancy may occur between the unit and the dashboard. If this happens, use the supplied frame to fill the gap.

Dashboard or console

Note
In some types of vehicles, discrepancy may occur between the unit and the dashboard. If this happens, use the supplied frame to fill the gap.

Installing the microphone (AVH-P3350BT only)

⚠️ CAUTION
It is extremely dangerous to allow the microphone lead to become wound around the steering column or gearstick. Be sure to install the unit in such a way that it will not obstruct driving.

Note
Install the microphone in a position and orientation that will enable it to pick up the voice of the person operating the system.

When installing the microphone on the sun visor

1. Install the microphone on the microphone clip.

2. Install the microphone clip on the sun visor.
With the sun visor up, install the microphone clip. (Lowering the sun visor reduces the voice recognition rate.)

When installing the microphone on the steering column

1 Install the microphone on the microphone clip.

2 Install the microphone clip on the rear side of the steering column.

Microphone clip
2 Clamp
Use separately sold clamps to secure the lead where necessary inside the vehicle.

Double-sided tape
2 Clamp
Use separately sold clamps to secure the lead where necessary inside the vehicle.

Adjusting the microphone angle

Microphone can be installed without using microphone clip. In this case, detach the microphone base from the microphone clip. To detach the microphone base from the microphone clip, slide the microphone base.

The microphone angle can be adjusted.

## Additional Information

### Message Cause Action

**Your device is not authorized to play this DivX protected video.**
This unit’s DivX registration code has not been authorized by the DivX VOD contents provider.
Register this unit to the DivX VOD contents provider.

**Authorization Error**
This unit’s DivX registration code has not been authorized by the DivX VOD contents provider.
Register this unit to the DivX VOD contents provider.

**Format Read**
Sometimes there is a delay between the start of playback and when you start to hear any sound.
Wait until the message disappears and you hear sound.

**Video frame rate not supported.**
DivX file’s frame rate is more than 30 fps.
Select a file that can be played.

**Audio format not supported.**
This type of file is not supported on this unit.
Select a file that can be played.

### iPod

**Message Cause Action**

**Format Read/Ready**
Sometimes there is a delay between the start of playback and when you start to hear any sound.
Wait until the message disappears and you hear sound.

**Error-02-6X/-9X/-DX**
Communication failed.
Disconnect the cable from the iPod. Once the iPod’s main menu is displayed, reconnect the iPod and reset it.

**Error-02-67**
The iPod firmware version is old.
Update the iPod version.

**Stop**
There are no songs.
Transfer songs to the iPod.

### Bluetooth

**Message Cause Action**

**Error-10**
The power failed for the Bluetooth module of this unit.
Turn the ignition switch OFF and then to ACC or ON. If the error message is still displayed after performing the above action, please contact your dealer or an authorized Pioneer Service Station.

### Understanding auto EQ/auto TA and EQ error messages

When correct measurement of the car’s interior acoustic characteristics is not possible using auto TA and EQ, an error message may appear on the display. In such cases, refer to the table below to see what the problem is and how it may be corrected. After checking, try again.

**Message Cause Action**

**Error. Please check MIC.**
The microphone is not connected.
Plug the optional microphone securely into the jack.

**Error. Please check xxxx speaker.**
The microphone cannot pick up the measuring tone of a speaker.
- Confirm that the speakers are connected correctly.
- Correct the input level setting of the power amp connected to the speakers.
- Plug the microphone securely into the jack.
### Understanding messages

</tbody>
</table>

### Indicator list

#### Area 1
- **Indicates that the selected frequency is being broadcast in stereo.**
- **Indicates that a Bluetooth telephone is connected.**
- **Indicates that the digital format is Dolby Digital.**
- **Indicates that the digital format is MPEG Audio.**
- **Indicates that the digital format is Linear PCM.**
- **Indicates the sampling frequency.**
- **Indicates that the digital format is DTS.**
- **Indicates the audio channel.**
- **Indicates that a disc with PBC On is being played.**
### Additional Information

**Area 2**
- Shows the disc/album currently being played.
- Shows the track/song currently being played.
- Shows the comment currently being played.

**Indicators**:
- Indicates that a cellular phone is connected.
- Indicates that an incoming call has been received and has not been checked yet.
- Not displayed for calls made when your cellular phone is disconnected from this unit.
- Indicates the battery strength of the cellular phone.
- The level shown on the indicator may differ from the actual battery strength.
- If the battery strength is not available, nothing is displayed in the battery strength indicator area.
- Indicates the signal strength of the cellular phone.
- Indicates that Dolby Pro Logic II is on.
- Indicates that Auto EQ is on.
- Shows which audio language has been selected.
- Shows which subtitle language has been selected.
- Shows which viewing angle has been selected.
- Shows which audio output has been selected.

**Area 3**
- Shows the title number currently being played.
- Shows the chapter number currently being played.
- Shows the genre of the track/song currently being played.
- Indicates that the feature demo is on.
- Shows cellular phone information.
- Shows general phone information.
- Shows home phone information.
- Shows office phone information.
- Shows other phone information.
- Shows the name of the folder currently being played.
- Shows the name of the file currently being played.
- Shows the preset number of the station currently being tuned in to.
- Shows the channel currently being tuned in to.

**En Pl**
Handling guidelines

Discs and player

Use only discs featuring any of following logos.

12-cm discs. Do not use 8-cm discs or an adapter for 8-cm discs.

Use only conventional, fully circular discs. Do not use shaped discs.

Do not insert anything other than a DVD (-R/-RW) or CD (-R/-RW) into the disc loading slot.

Do not use cracked, chipped, warped, or otherwise damaged discs as they may damage the player.

Unfinalized CD-R/CD-RW discs cannot be played back.

Do not touch the recorded surface of the discs.

Store discs in their cases when not in use.

Do not attach labels, write on or apply chemicals to the surface of the discs.

To clean a disc, wipe the disc with a soft cloth outward from the center.

Condensation may temporarily impair the player’s performance. Let it rest for about one hour to adjust to a warmer temperature. Also, wipe any damp discs off with a soft cloth.

Playback of discs may not be possible because of disc characteristics, disc format, recorded application, playback environment, storage conditions, and so on.

Road shocks may interrupt disc playback.

Read the precautions for discs before using them.

Certain functions may not be available for some DVD video discs.

It may not be possible to play back some DVD video discs.

It is not possible to play back DVD-RAM discs.

This unit is not compatible with discs recorded in AVCHD (Advanced Video Codec High Definition) format. Do not insert AVCHD discs as you may not be able to eject the disc.

External storage device (USB, SD)

Depending on the external storage device (USB, SD), the following problems may occur.

- Operations may vary.
- The storage device may not be recognized.
- Files may not be played back properly.

USB storage device

Connections via USB hub are not supported.

Do not connect anything other than a USB storage device.

Firmly secure the USB storage device when driving. Do not let the USB storage device fall onto the floor, where it may become jammed under the brake or accelerator pedal.

Depending on the USB storage device, the device may cause noise to occur in the radio.

Copyright protected files that are stored in the USB devices cannot be played back.

You cannot connect a USB portable audio player/USB memory to this unit via USB hub.

Partitioned USB memory is not compatible with this unit.

Depending on the kind of USB portable audio player/USB memory you use, the device may not be recognized or audio files may not be played back properly.

Do not leave the USB portable audio player/USB memory in direct sunlight for extended amounts of time. Doing so may cause the device to malfunction from the extreme rise in temperature.
## Additional Information

### SD memory card

This unit supports only the following types of SD memory cards.
- SD
- SDHC

Keep the SD memory card out of the reach of children. Should the SD memory card be swallowed, consult a doctor immediately.

Do not touch the connectors of the SD memory card directly with your fingers or with any metal device.

Do not insert anything other than an SD memory card into the SD card slot. If a metal object (such as a coin) is inserted into the slot, the internal circuits may break and cause malfunctions.

Do not insert a damaged SD memory card (e.g. warped, label peeled off) as it may not be ejected from the slot.

Do not try to force an SD memory card into the SD card slot as the card or this unit may be damaged.

When ejecting an SD memory card, press it and hold it until it clicks. It is dangerous for you to release your finger immediately after you press on the card as the card may shoot out of the slot and hit you in the face, etc. If the card shoots out of the slot, it may become lost.

### iPod

To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.

Firmly secure the iPod when driving. Do not let the iPod fall onto the floor, where it may become jammed under the brake or accelerator pedal.

About iPod settings
- When an iPod is connected, this unit changes the EQ (equalizer) setting of the iPod to off in order to optimize the acoustics. When you disconnect the iPod, the EQ returns to the original setting.
- You cannot set Repeat to off on the iPod when using this unit. Repeat is automatically changed to All when the iPod is connected to this unit.

Incompatible text saved on the iPod will not be displayed by the unit.

### DVD-R/DVD-RW discs

Unfinalized DVD-R/-RW discs which have been recorded in the Video format (video mode) cannot be played back.

Playback of DVD-R/DVD-RW discs may not be possible, due to disc characteristics, scratches or dirt on the disc, or dirt, condensation, etc. on the lens of this unit.

Depending on the application settings and the environment, playback of discs recorded on a personal computer may not be possible. (For details, contact the manufacturer of the application.)

### CD-R/CD-RW discs

When CD-R/CD-RW discs are used, playback is possible only for discs which have been finalized.

Playback of CD-R/CD-RW discs recorded on a music CD recorder or a personal computer may not be possible due to disc characteristics, scratches or dirt on the disc, or dirt, condensation, etc., on the lens of this unit.

Depending on the application settings and the environment, playback of discs recorded on a personal computer may not be possible. (For details, contact the manufacturer of the application.)

Playback of CD-R/CD-RW discs may become impossible in case of direct exposure to sunlight, high temperatures, or the storage conditions in the vehicle.

Titles and other text information recorded on a CD-R/CD-RW disc may not be displayed by this unit (in the case of audio data (CD-DA)).

### DualDiscs

DualDiscs are two-sided discs that have a recordable CD for audio on one side and a recordable DVD for video on the other.

Playback of the DVD side is possible with this unit. However, since the CD side of DualDiscs is not physically compatible with the general CD standard, it may not be possible to play the CD side with this unit.

Frequent loading and ejecting of a DualDisc may result in scratches on the disc. Serious scratches can lead to playback problems on this unit. In some cases, a DualDisc may become stuck in the disc loading slot and will not eject. To prevent this, we recommend you refrain from using DualDisc with this unit.

Please refer to the information from the disc manufacturer for more detailed information about DualDiscs.
JPEG picture files

JPEG is short for Joint Photographic Experts Group and refers to a still image compression technology standard.

Files are compatible with Baseline JPEG and EXIF 2.1 still images up to a resolution of 8,192 × 7,680. (EXIF format is used most commonly with digital still cameras.)

Playback of EXIF format files that were processed by a personal computer may not be possible.

There is no progressive JPEG compatibility.

DivX video files

Depending on the composition of the file information, such as the number of audio streams or file size, there may be a slight delay when playing back discs.

Some special operations may be prohibited due to the composition of the DivX files.

Only DivX files downloaded from a DivX partner site are guaranteed for proper operation. Unauthorized DivX files may not operate properly.

DRM rental files cannot be operated until playback is started.

Recommended file size: 2 Mbps or less with a transmission rate of 2 GB or less.

The ID code of this unit must be registered to a DivX VOD provider in order to playback DivX VOD files. For information on ID codes, refer to Displaying the DivX VOD registration code on page 63.

For more details about DivX, visit the following site: http://www.divx.com/

Important

- When naming a JPEG image file, add the corresponding filename extension (.jpg, .jpeg, .jpe or .jfif).
- This unit plays back files with these filename extensions (.jpg, .jpeg, .jpe or .jfif) as a JPEG image file. To prevent malfunctions, do not use these extensions for files other than JPEG image files.

Compressed audio compatibility (disc, USB, SD)

WMA

File extension: .wma

Bit rate: 5 kbps to 320 kbps (CBR), VBR

Sampling frequency: 8 kHz to 48 kHz

Windows Media Audio Professional, Lossless, Voice/DRM Stream/Stream with video: Not compatible

MP3

File extension: .mp3

Bit rate: 8 kbps to 320 kbps

Sampling frequency: 8 kHz to 48 kHz (32 kHz, 44.1 kHz, 48 kHz for emphasis)

Compatible ID3 tag version: 1.0, 1.1, 2.2, 2.3 (ID3 tag Version 2.x is given priority over Version 1.x.)

M3u playlist: Not compatible

MP3i (MP3 interactive), mp3 PRO: Not compatible

AAC

Compatible format: AAC encoded by iTunes

File extension: .m4a

Sampling frequency: 8 kHz to 44.1 kHz

Bit rate: 8 kbps to 320 kbps

Apple Lossless: Not compatible

AAC file bought from the iTunes Store (.m4p file extension): Not compatible

DivX compatibility

Compatible format: DivX video format implemented in relation to DivX standards

File extensions: .avi or .divx

DivX Ultra format: Not compatible

DivX HD format: Not compatible

DivX files without video data: Not compatible

DivX plus: Not compatible

Compatible audio codec: MP2, MP3, Dolby Digital
Additional Information

LPCM: Not compatible
Bit rate: 8 kbps to 320 kbps (CBR), VBR
Sampling frequency: 8 kHz to 48 kHz
Compatible external subtitle file extension: .srt

Supplemental information

Some characters in a file name (including the file extension) or a folder name may not be displayed.

This unit may not operate correctly depending on the application used to encode WMA files.

There may be a slight delay at the start of playback of audio files embedded with image data or audio files stored on an external storage device (USB/SD) that has numerous folder hierarchies.

Russian text to be displayed on this unit should be encoded in one of the following character sets:

- Unicode (UTF-8, UTF-16)
- A character set other than Unicode that is used in a Windows environment and is set to Russian in the multi-language setting

Disc

- Playable folders: up to 700
- Playable files: up to 999 for CD-R/CD-RW
- Playable files: up to 3,500 for DVD-R/DVD-RW
- File system: ISO 9660 Level 1 and 2, Romeo, Joliet, UDF 1.02 (DVD-R/DVD-RW)
- Multi-session playback: Compatible
- Packet write data transfer: Not compatible

Regardless of the length of blank sections between the songs from the original recording, compressed audio discs play with a short pause between songs.

External storage device (USB, SD)

- Playable folders: up to 6,000
- Playable files: up to 65,535, up to 255 for one folder
- Playback of copyright-protected files: Not compatible
- Partitioned external storage device (USB, SD): Only the first playable partition can be played.
- There is no compatibility for Multi Media Cards (MMC).
- Compatibility with all SD memory cards is not guaranteed.
- This unit is not compatible with SD-Audio/SD-Video.

⚠️ CAUTION

- Pioneer accepts no responsibility for data lost on the USB memory/USB portable audio player/SD memory card even if that data is lost while using this unit.
- Do not leave the discs/external storage device (USB, SD) or iPod in places with high temperatures.

iPod compatibility

This unit supports only the following iPod models. Supported iPod software versions are shown below. Older versions may not be supported.

- iPhone 4 (software version 4.1)
- iPhone 3GS (software version 4.1)
- iPhone 3G (software version 4.1)
- iPhone (software version 3.1.3)
- iPod nano 5th generation (software version 1.0.2)
- iPod nano 4th generation (software version 1.0.4)
- iPod nano 3rd generation (software version 1.1.3)
- iPod nano 2nd generation (software version 1.1.3)
- iPod nano 1st generation (software version 1.3.1)
- iPod touch 3rd generation (software version 4.0)
- iPod touch 2nd generation (software version 4.0)
- iPod touch 1st generation (software version 3.1.3)
- iPod classic 160GB (software version 2.0.4)
- iPod classic 120GB (software version 2.0.1)
- iPod 5th generation (software version 1.3)

Depending on the generation or version of the iPod, some functions may not be available.

Operations may vary depending on the software version of iPod.

When using an iPod, an iPod Dock Connector to USB Cable is required.

When you use Pioneer CD-IU50/CD-IU200V interface cable, consult your dealer for details.

About the file/format compatibility, refer to the iPod manuals.

Audio Book, Podcast: Compatible
CAUTION
Pioneer accepts no responsibility for data lost on the iPod, even if that data is lost while this unit is used.

Sequence of audio files
The user cannot assign folder numbers and specify playback sequences with this unit.

Example of a hierarchy

Disc
Folder selection sequence or other operation may differ depending on the encoding or writing software.

External storage device (USB, SD)
The playback sequence is the same as the recorded sequence in the external storage device (USB, SD).

To specify the playback sequence, the following method is recommended.
1. Create a file name that includes numbers that specify the playback sequence (e.g., 001xxx.mp3 and 099yyy.mp3).
2. Put those files into a folder.
3. Save the folder that contains the files to the external storage device (USB, SD).

However, depending on the system environment, you may not be able to specify the playback sequence.

For USB portable audio players, the sequence is different and depends on the player.

Using the display correctly

CAUTION

- If liquid or foreign matter should get inside this unit, turn off the power immediately and consult your dealer or the nearest authorized PIONEER Service Station. Do not use the unit in this condition because doing so may result in fire, electric shock, or other failure.
- If you notice smoke, a strange noise or smell, or any other abnormal signs from the display, turn off the power immediately and consult your dealer or the nearest authorized PIONEER Service Station. Using this unit in this condition may result in permanent damage to the system.
- Do not disassemble or modify this unit, as there are high-voltage components inside which may cause electric shock. Be sure to consult your dealer or the nearest authorized PIONEER Service Station for internal inspection, adjustments, or repairs.

Handling the display

- Never touch the screen with anything besides your finger when operating the touch panel function. The screen can scratch easily.
- When the display is subjected to direct sunlight for a long period of time, it will become very hot resulting in possible damage to the LCD screen. You should avoid exposing the display unit to direct sunlight as much as possible.
- The display should be used within the temperature range of –10°C to +60°C. At temperatures higher or lower than this operating temperature range, the display may not operate normally.
- The LCD screen is exposed in order to increase its visibility within the vehicle. Do not press it strongly on it as this may damage it.
- Do not push the LCD screen forcefully as this may scratch it.
Liquid crystal display (LCD) screen
- Heat from the heater may damage the LCD screen, and cool air from the cooler may cause moisture to form inside the display resulting in possible damage.
- Small black dots or white dots (bright dots) may appear on the LCD screen. These are due to the characteristics of the LCD screen and do not indicate a malfunction.
- When using a cellular phone, keep the antenna away from the display to prevent disruption of the video image by the appearance of spots, colored stripes, etc.

LED (light-emitting diode) backlight
- At low temperatures, using the LED backlight may increase image lag and degrade the image quality due to the characteristics of the LCD screen. Image quality will improve with an increase in temperature.
- To protect the LED backlight, the display will darken in the following environments:
  - In the direct sunlight
  - Near the heater vent
- The product lifetime of the LED backlight is more than 10 000 hours. However, it may decrease if used in high temperatures.
- If the LED backlight reaches the end of its product lifetime, the screen will become dark and the image will no longer be projected. In such cases, please consult your dealer or the nearest authorized PIONEER Service Station.

Copyright and trademark
This item incorporates copy protection technology that is protected by U.S. patents and other intellectual property rights of Rovi Corporation. Reverse engineering and disassembly are prohibited.

Bluetooth
The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Pioneer Corporation is under license. Other trademarks and trade names are those of their respective owners.
- Bluetooth is a short-range wireless radio connectivity technology that is developed as a cable replacement for mobile phones, handheld PCs and other devices. Bluetooth operates in 2.4 GHz frequency range and transmits voice and data at speeds up to 1 megabit per second. Bluetooth was launched by a special interest group (SIG) that comprises of Ericsson Inc., Intel Corp., Nokia Corp., Toshiba and IBM in 1998, and it is currently developed by nearly 2 000 companies worldwide.

DVD video
DVD is a trademark of DVD Format/Logo Licensing Corporation.

iTunes
Apple and iTunes are trademarks of Apple Inc., registered in the U.S. and other countries.

Keeping the display in good condition
- When removing dust from the screen or cleaning the display, first turn the system power off, then wipe with a soft dry cloth.
- When wiping the screen, take care not to scratch the surface. Do not use harsh or abrasive chemical cleaners.
MP3
Supply of this product only conveys a license for private, non-commercial use and does not convey a license nor imply any right to use this product in any commercial (i.e. revenue-generating) real time broadcasting (terrestrial, satellite, cable and/or any other media), broadcasting/streaming via internet, intranets and/or other networks or in other electronic content distribution systems, such as pay-audio or audio-on-demand applications. An independent license for such use is required. For details, please visit http://www.mp3licensing.com.

WMA

Continuous power output .......... 22 W × 4 (50 Hz to 15,000 Hz, 5 % THD, 4 Ω load, both channels driven)
Load impedance .......... 4 Ω (4 Ω to 8 Ω (2 Ω for 1 ch) allowable)
Preout maximum output level .......... 4.0 V
Equalizer (8-Band Graphic Equalizer):  
Frequency .......... 40/80/200/400/1k/2.5k/8k/10 kHz
Gain .......... ±12 dB
HPF:  
Frequency .......... 50 Hz/63 Hz/80 Hz/100 Hz/125 Hz
Slope .......... −12 dB/oct
Subwoofer (mono):  
Frequency .......... 50 Hz/63 Hz/80 Hz/100 Hz/125 Hz
Slope .......... −18 dB/oct
Gain .......... +6 dB to −24 dB
Phase .......... Normal/Reverse
Bass boost:  
Gain .......... +12 dB to 0 dB

**DVD Player**
System .......... DVD video, Video CD, CD, WMA, MP3, AAC, DivX, JPEG system
Usable discs .......... DVD video, Video CD, CD, CD-R/RW, DVD-R/RW/R DL
Region number .......... 4 for South American and Oceanian models  
Region number .......... 2 for Middle East Asian and South African models
Frequency response .......... 5 Hz to 44,000 Hz (with DVD, at sampling frequency 96 kHz)
Signal-to-noise ratio .......... 96 dB (1 kHz) (IEC-A network) (RCA level)
Output level:  
Video .......... 1.0 Vp-p/75 Ω (±0.2 V)
Number of channels .......... 2 (stereo)
MP3 decoding format .......... MPEG-1 & 2 Audio Layer 3
WMA decoding format .......... Ver. 7, 7.1, 8, 9, 10, 11 (2ch audio)
(Windows Media Player)
AAC decoding format .......... MPEG-4 AAC (iTunes encoded only) (.m4a)
(Ver. 8.2 and earlier)
DivX decoding format .......... Home Theater Ver. 3, 4, 5.2, 6 (.avi, .divx)

**USB**
USB standard specification .......... USB 1.1, USB 2.0 full speed
Maximum current supply .......... 500 mA
USB Class .......... MSC (Mass Storage Class)
File system .......... FAT16, FAT32
MP3 decoding format .......... MPEG-1 & 2 Audio Layer 3
WMA decoding format .......... Ver. 7, 7.1, 8, 9, 10, 11 (2ch audio)
(Windows Media Player)
**Additional Information**

AAC decoding format........MPEG-4 AAC (iTunes encoded only)  
(Ver. 8.2 and earlier)

DivX decoding format........Home Theater Ver. 3, 4, 5.2, 6 (.avi, .divx)

**SD**

Compatible physical format  
----------------------------------------  
Version 1.10

File system .................. FAT12, FAT16, FAT32

MP3 decoding format ..........MPEG-1 & 2 Audio Layer 3

WMA decoding format ..........Ver. 7, 7.1, 8, 9, 10, 11 (2ch audio)  
(Windows Media Player)

AAC decoding format ..........MPEG-4 AAC (iTunes encoded only)  
(Ver. 8.2 and earlier)

DivX decoding format ..........Home Theater Ver. 3, 4, 5.2, 6 (.avi, .divx)

**FM tuner**

Frequency range .................87.5 MHz to 108.0 MHz

Usable sensitivity ..............9 dBf (0.8 µV/75 Ω, mono,  
S/N: 30 dB)

Signal-to-noise ratio ..........72 dB (IEC-A network)

**AM tuner**

Frequency range .................531 kHz to 1 602 kHz (9 kHz)  
530 kHz to 1 640 kHz  
(10 kHz)

Usable sensitivity ..............25 µV (S/N: 20 dB)

Signal-to-noise ratio ..........62 dB (IEC-A network)

**Bluetooth**

(AVH-P3350BT)

Version .......................Bluetooth 2.0 certified

Output power ...................+4 dBm Max.  
(Power class 2)

**Infrared remote control**

Wavelength .....................945 nm

Output .........................typ: 10 mw/sr per Infrared LED

**Note**

Specifications and the design are subject to modifications without notice.
